By J. HARVEY BACKUS & SON OUR KEYNOTE: "If There Is Not A Way, Cut A Way"

## Happy New Year

one another a "Happy New Year." It is a sincere not incompatible. wish, one that each earnestly hopes for his or her

own sphere he can make it a noble year, one that will mankind makes it. But the it be true, many people regarding the money situation.

In letters I shall be addressing to Four More Projects

Only those who are closely connected with the the club. Send in your membership Four More Projects

A - A a fault of human nature.

The future is only another name for opportunity, it is not impossible that all nations will soon be forced a lot of fun together for the next and opportunity carries with it responsibilities. It is off the gold standard and such an event will speed the two years. not a time for trifling, but then neither is it a time for istabilization move. hopeless gloom or surrender in the face of difficulties. The bright part of the picture for this country is So the needed message at this season seems to be one that it stands in a commanding position to obtain con-

Strength and hope may be had from the sacred comes for negotiations. memories which all lives have, and so it is impossible to think wisely of the future, or to face it as it should be faced, except as related to the past, and having a lof the current style bathing suits to feed one moth the vital connection with it.

Everyone has had economical difficulties but the happiness and fullness of life is not measured in terms of money. True, we must have enough to fill our needs, but it cannot bring happiness. In our own acis the key to happiness.

A Happy New Year? Yes, surely, but better yet a New Year consecrated to truth, and to the service of man, for that will bring, if not happiness, blessedness. The old and the new unite, the present and past merge in each other and in the present, and life is one and continuous. As we look back on 1934 as it finally fades away, what kind of year will it be? It is now for you in the highly competitive business of farming, as Mr. to decide, and then carry out your resolve. Your hapriness and welfare depends upon it.

Scientists are attempting to calculate the age of the sun and they will no doubt attribute its longevity to the fact that it never stays out at night.

## The Duty of the Individual

of the individual to act.

So, in order to get improvement, every citizen of their share of the work that is required.

The citizen who is satisfied with everything, who corn or wheat. wants to "let well enough alone" on the theory that advancement will require some extra effort on his part, will sooner or later slide into the rut from which he gold diggers.

will never emerge. When this type of citizen suddenly awakens to the fact that he has been following the same line for years and that he has spent the best part of his life without IT IS a temptation in cold weather to force fires in en satisfactory, because it kills the accomplishing anything, he blames the community, his heating systems in order to keep warm, or to warm tree and prevents further sprouting. neighbors, his friends and his job for his failure. will find that he alone is to be blamed. If he is hon-during winter. Thoughtlessness in tending fires, radiat- and one-half pints of water. A gash est with himself, he will recall how he repulsed every ed heat which chars beams, floors or walls which are is made thru the bark of the thorn

projects to improve the community. He will look back over the productive years of his fires which originate with heating apparatuses. life and see failure written there because he resisted civic responsibility.

individuals who live in it. If they are listless and not long. If this is done, the greatest danger is eliminated, spilled with fatal results. The trees, alert to the opportunities, don't accept their obligations as citizens, there isn't much hope of keeping pace with ards that exist to create fire dangers. Inspect progressive communities that are growing and constant-flues, smoke pipes and exposed metal parts of heating then be safe for grazing in the y becoming better places in which to live.

## Football Casualties Decline

COMPILATION of statistics on the football season U just brought to a close reveal that the number of year. It is easy to take necessary precautions. Do not apple. This tool may be obtained fatal accidents has been greatly reduced over last, year. let yourself be the next-victim. This is most encouraging as the death list of this national sport had reached alarming proportions during 1931 and 1932.

In 1931 fifty deaths were recorded and in 1932 prosperity. there were 38 fatalities. These high figures threatened) to cause serious curtailment and revision of the game. Rules were changed, with the flying tackle and other the winter time? dangerous practices of the game eliminated.

It is difficult to ascertain whether the change of rules or other efforts were responsible for the decline, terrible—unless you are waiting on ducks, rabbits or toes. It is generally recommended but the result of the 1933 football activities showed some other game. that only 26 deaths were caused as the result of the game. The majority of these were among teams of small schools including neighborhood children at play some kinds seem to be entirely too many; and none of them among colleges and universities in regular play. This bears out the claims that proper training and supervising eliminates the hazards of the time of the year.

the number that play the games and with the fatalities' safety in the game and better supervision of the among the smaller organizations following the game will eventually lower this year's figure substantially.

# Let the car speak for itself

HUNDREDS of thousands of people now own and drive Ford V-8 cars. Some neighbor or friend of yours has one. If we told you what we think of the car, you might say we are prejudiced, so we let the car and its owner tell you.

Economy of operation is one of the first points they will emphasize—the owner will boast of it and the car will prove it.

The 1934 car is even better than the 1933and that was our best car up to its time. The new car is more beautiful -- faster -- more powerful -gives more miles to the gallon-better oil economy-is easier riding-cheaper to own and operate than any car we ever built.

You owe it to yourself and your pocketbook to ask our Ford Dealer to let you see this car, and let you drive it for yourself. At the wheel of the car you will be sure to reach a right decision. The Ford V-8 will tell you its own story.
