It is natural to pay a great deal of respect to those who sacrifice for the welfare of their fellow men. Dickens used this feeling of gratitude in his "Tale of Two Cities," to raise the drunkard, Sidney Carton to the status of a hero. The people who benefit by such a sacrafice are usually incapacitated in one of two ways: They are either—under such circumstances that they cannot help themselves, or they are deficient in moral strength and courage. In respect to our worldly sins, we are under both of these handicaps. We are so created that sin is natural to us. When we come face to face with temptation we realize that we are, oh, so deficient in moral strength and courage. With these facts in mind, consider the greatness of the sins of all the world. The man who makes a sacrifice must be one who has the power to overcome the incapacities of his fellows in such abundance that he is able to make up for their weaknesses. How wonderful then, must Jesus have been to have virtue so great that he could live in the midst of sin and temptation and bear up, a perfect man. Not considering his personal agony on Calvary, but the henefits we received by his dying and thereby catablishing hope for sinners, how can we pay enough respect? Therefore, let us carry something more than a permanent wave in the Easter bonnet, and something hesides a gold watch under the new vest. Let us enter our sanctuaries permeated with memories of Calvary. us enter our sanctuaries permeated with memories of Calvary.

All Doods' Fay

Dear Students:

I mean people that go to the school building every day or even once in a while, do you know what day follows March 31? No not March 32nd and not May Day; of course Xmas does but it's not of that I'm thinking. ALL FOOLS' LAY! Your day! Seriously tho, cn't you think it would be a good idea to do something DIFFERENT on All Fools' Day? Yes, something sensible. D-jever wonder how this All Fools' Day business got started? Seems logical to think some fool was born on that day, but no that's out; we couldn't all have our birthady on March 32nd. The man'll hafta be purty gud ta git ahead of us at A. H. There is quite a dispute at present over hiring orchestras. Those that are being considered are: Ben Bernie, with a salary of \$3,065 per week, Cab Calloway, \$3,750; Duke Wellington, \$3,800; Guy Lombardo, \$4,000.03. Students are requested to send in the name of their favorite orchestra to the editor-in-chief of the Hi-Herald at once. Fortunately, we will have Miss Russ and her "Rushmen" until a definite decision is made.

Our charming Lee Rogers has been chosen as hostess and she has offered her services free to help promote this extraordinary project. Wallace Clarke is to have charge of all the mixing of liquids. He has had much experience in the A. H. S. laboratories. His salary will be \$1,-250 per month. Wallace will also see that the gentlemen do not remove their coats while in the Garden.

## GUESS WHO ?

A certain faculty member is to be described to you this week, so you will have to think hard. He is very short and fat, has coal black hair. He has a blue car. He de-tests football and will not come near the field. He usually wears a light-colored suit to school.

lish III. party, in the sense that everyone would be on the committee."

The three boys brought the idea up in the English Class. Everyone agreed so enthusiastically that it would be a good idea. They decided it would be great fun to pull an April Fool on everyone, so ten minutes of each day were set aside to work on plans for their party. It was finally decided to have the party free of charge so as to fool the crowd. This would mean more people, and the more, the merrier.

The orchestra was very kindly donated, and the members of the Class made the refreshments; cake and ice cream. People would come for the refreshments if nothing else, thought Jimmy Lynch.

Miss Cliffort: "Each of you invite as many friends as you wish. It won't be possible for everybody who is invited to come."

Mary McA: "Never mind, Rita, we'll see them at the party, then you can show them around."

Then came a long wait. We could hear a crowd gathering outside. After what seemed to be an eternity there was a terrible howling from the crowd, and all was quiet again. When we had just about given up hope of getting out of the place that night, the lights came on; a key rattled in the key-hole and in walked Mr. Hardy.

"Let's get going, set up your or chestra, cut the cake and open the ice cream. You're all in for a good time tonight," he cried.

True to his word, we had a large time, as Decatur says. Still there remained a mystery. Mr. Hardy had locked the doors behind him and all of the people who were invited to the party.

The mystery was solved, however, at about 2 o'clock the next morning when the party was all over, and Mr. Hardy unlocked the doors so that we could go home. In big red letters across the entrance of the building was a sign, lighted with electricity, saying:
