## A Great Opportunity

residential units, including apartments, are built an- be placed on other property in the community, nually in the United Etates. Only 50,000 were built in 1933.

bulk of citizens live in homes equipped with at least lollars in your pocket. the basic conveniences. But a recent federal report says that of 6,300,000 farm homes surveyed, only 990, 000 had water piped into the house. The balance, or more than 5,000,000 rural homes, is thus without sanitary conveniences of any kind.

Here, then, are two phases of the construction use them. field—new building and improvements and additions t existing structures. Each entail potential expenditures running far into the billions. Each means vast numbers of potential jobs—both in actual construction and THE Federal government, thru the Interstate Com- good, they should attract the wasps there is a tremendous unsatisfied demand on the part of the public.

An aggressive campaign to unloose private capital for residential building is now starting. If it succeeds, it will force prices up, and put a premium materials and skilled labor. There's a tip in that for those who have money now-prices are still near the bottom, and the wise property owner can get needed improvements and additions for a fraction of what they will cost in the near future.

Now and then you will find a man who admits that his word isn't law at home.

COVERNMENT control of everything from popcorn to railroads will be hastened and thousands of additional jobs on the public payroll will be created if eliminate the fly-by-nights in their business. the Smith Bill (S. 3326) is adopted by Congress, mak-tain parts of the country, rate-making by bus and and placed it in the revolver. Police ing changes in the A. A. A., as recommended by Sectruck companies has been little short of scandalous retary of Agriculture Wallace.

hurst, associate counsel of the National Association of Manufacturers, pointed out that the bill "would bring go a long way toward solving the entire transport under the dominion of a single political officer the en-problem. tire food manufacturing industry, all branches of the textile and clothing industry, leather goods and shoe manufacturing, every phase of the tobacco industry. and any manufacturing establishment handling any byproduct of agriculture."

A CHEERING report has just been issued by the sheep and wants me to put up one-

That makes it look as if the American people are J. P. Willman of the department really beginning to regard fire waste as being the un- of animal husbandry at Cornel necessary tragedy that it is. During the past few years answers: "I do not know just what there have been declines in the dollar total-but that kind of fence you are required by has been principally due to declines in property values, law to use. I believe you can oband not to fewer fires. This year, however, property tain the necessary information values are somewhat above the 1933 level-so the writing to Commissioner Charles H.

three-months decline really means something. If even a 15 per cent, reduction can be achieved this year, it will mean the saving of many lives . will mean that property worth about \$60,000,000 has mend for sheep, we will be pleased been preserved to serve a useful purpose. It will mean to send you this information. AS NEW building statistics appear, the opportunity that men will keep jobs that would disappear if fire understand your letter correctly, A for using stimulated construction as a weapon in damaged or destroyed the factories and plants where however, you are more interested in fighting depression is seen in more accurate perspec-they work. It will mean that taxes will be lower than knowing the wording of the law as it they would be otherwise—every fire which destroys applies to your problem." On the average, between 400,000 and 500,000 new taxable property of any kind causes the lost taxes to

Do your bit to hold and add to this reduction. Keep eternally on the watch for fire hazards on your rid of them. Can they be poison-We think of America as a nation in which the property, and eliminate them. It will put hard round ed?"

> This year's dandelion crop will probably have in common with the forgotten man.

#### Transportation Rate Chaos

merce Commission, regulates the rates charged by more readily." the railroads. It does this in the public interest, prevent discrimination, and to assure reasonable charge Son Seriously Affected for transportation of goods and persons.

According to the Transportation Conference of 1933-34, which was attended by representatives of 1 national organizations interested in one form or an-and mathematics in Hornell other of transport, the government's rate jurisdiction School was accidently shot and inshould be extended to include common, contract and stantly killed last Friday by her anywhere-for-hire interstate carriers on highways and 13-year-old son, George Miner. The inland waterways.

It is the belief of the Conference that all trans. He was the only immediate relative port rates should be fair and non-discriminatory, should at the funeral of his mother be published, should be adhered to with penalties for Despite every effort of authoriviolation, and should not be changed without adequate ties and friends of the family notice to the public.

That recommendation represents the view of not futile. Presence of a physician is only the railroads, but of responsible highway and required for the most part. George water carriers who are as anxious as anyone else to lived alone with the mother. operators have charged whatever they wished to, and Appearing before the Committee, R. S. Smeth-changed schedules and charges daily if they pleased. Elimination of the rate chaos now prevailing would the woman's heart.

#### Watch the Mines

IT IS generally believed that the Federal Government While the bill purports to be an amendment de la is considering legislation to spur the production If that is done, it will mean much to the country!

The mines of Nevada, Utah and other states were three upper classes, is awarded to a to license not only the processor, producer or handler once their most important asset. They employed the Senior girl for character, scholar-Purchasing directly from the farmer, but to license and most labor. They provided the best investment opport ship, ability, participation in extracontrol to a considerable extent the sale and resale of tunities. They had the largest payrolls. They were curricular activities and loyalty such products down to the corner food stand or the the principal taxpayers. The purchasing power they every way to the University created provided an appreciable percentage of the live-senior in the Glass Technology Delihood of farmers, storekeepers, doctors—all types of partment, has been awarded the "upon such terms and conditions as the Secretary of workers. And, thru the process of expansion which Men's Loyalty Medal, signifying money always follows, it spread across the country, that in the opinion of all the stubenefitting all industries, all citizens.

Mining legislation will be watched for eagerly. If acter, scholarship, ability and partaken a real step toward recovery.
