Alcohol Will Not Harm New Body Paint

Says Guy S. Wood, Local Ford Dealer.

A radically different type of automobile body paint, which is impervious to alcohol and is baked in for four hours at a temperature of 250 degrees, has been developed by the engineers of the Ford Motor Company.

This new body finish has nothing in common with other finishes. You can pour alcohol over it, light a match to the alcohol, and, altho the surface will be terribly hot, it will remain unimpaired. Alcohol, which is a solvent for most body finishes, will exercise no harmful effects on the V-8's body finish.

Moreover, this paint is eminently satisfactory in any climate and under all conditions of weather. It is an enamel that is elastic. An exclusive Ford product, its base is a combination of the rare earths of Titanium and Antimony with the necessary color pigments.

Heretofore, motorists have had to be very careful when using alcohol around the car. A drop or two spilled on the surface marred the finish. This is a thing of the past as far as new Fords are concerned. This finish will last indefinitely. The motorist who would keep his car nice and shiny may do so by the simple process of running a cloth over it now and then and giving it a polishing once in a while.

Rebekahs Honor State President

Andover Rebekah Lodge was represented by several officers and members in attendance at a reception at Allentown in honor of Mrs. Clara Ingalls, president of New York State Rebekah Assembly, on Wednesday evening.

The guests included other Assembly officers and members from Rochester, Hamburg, Watkins Glen, Elmira, Olean and Canisteo.

Nearly all of the 14 lodges in Allegany county were also represented. An entertainment appropriate to the occasion was furnished by the lodges present.

Assembly President Mrs. Ingalls was called upon for remarks to which she responded very ably, as did other state officers who complimented her upon her years of untiring efforts and loyalty in Odd Fellowship.

Mrs. Ingalls was presented many beautiful floral pieces and gifts. Refreshments were served.

The Sugar Bowl

JOHN KARCANES, Prop.

PUZZLE . . . FIND THE NEW ELECTRIC REFRIGERATOR IN MRS. G'S ELECTRIC BILLS

ANSWER, you can't find it because the cost of electricity has come down!

You'd think that with her new electric ironer, refrigerator and vacuum cleaner, Mrs. G's electric bills would be considerably higher than a few years ago. But they aren't! And the reason is that while Mrs. G's use of electricity has increased, the cost of electricity here has come down.

Mrs. G's case is not unusual. Many people have had the same experience. They've found that while their use of electricity has doubled or even tripled, they are paying only a few cents a day more than before.

Electricity is the biggest bargain you can buy . . . and the more you use, the bigger the bargain.
