Rheumatic Pain Stopped by Lemon Juice Recipe

if you ask him to so so.

I HE New Firestone High Speed fire for 1934 was built to give you the same dependable service i provided for the 33 drivers who started in the torturous 500-mile grind at Indianapolis May 30. This new tire has a wider tread of flatter contour, deeper non-skid more and tougher rubber, giving you more than 50% longer

Besides being Safety Protected on the outside it is Safety Protected on the inside. Eight additions pounds of pure rubber are absorbed by every one hundred pounds of

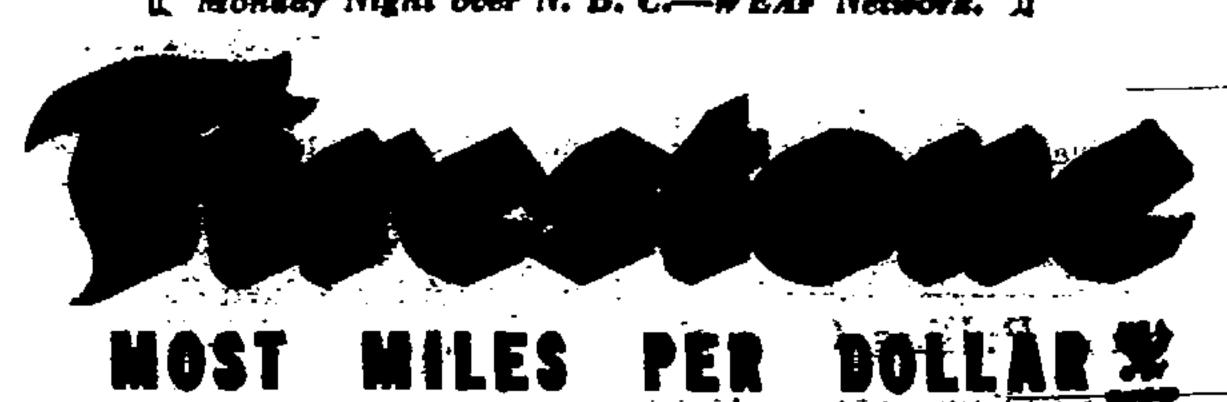

This additional rubber is to placed that it surrounds every cotton fiber inside every cord in every ply. This is accomplished by soaking the cords in liquid rubber by a Firestone patented process. This patented process, Gum-Dipping, is not used in any other tire built. Heat caused by internal friction cotton fibers destroys tires causes separation and blowouts.

Gum-Dipping counteracts friction and heat-provides greater adhesion and binds the cotton and rubber together into one cohesive unit of greater strength, assuring car owners of the greatest Safety, possible for human ingenuity to The most amaxing proof o this extra strength, safety and dependability is the fact that every

one of the 33 drivers at Indianapolis Speed Tires. Race drivers KNOW tire construction - they will not risk their lives or chance of victory on any other than Firestone. terrific speeds the care plunge into the treacherous turns tires are braced against the scorching brick track-so hot the tires fairly smoke at times—they give - yield and stretch - every conceivable force works to tear the Speed Tires "come back" on the straightsways. Not once during the

tire to pieces, yet Ffrestone Hig entire race did a tire fail. Surely this is the most amaxing proof ever known of Extra Strength, SAFETY and dependability. Call on the Firestone Service Dealer or Service Store mearest you TODAY. Equip your ear with New Pirestone High Speed Tires for 1934.
