"Is zat so! Say, did you ever try to push the tooth paste back in the tube?"

**Made to Order**

"To them who in the love of Nature, hold communion with her visible forms she speaks a various language"—also in the variety of seasons with which she is pleased to present for our analysis you will always find her playing favorites.

Some years abundant yields of grain; then she will show what she can do with fruits. We have also our fat and lean seasons for the growing of potatoes and other root crops.

Whatever she has provided for this season in the growth of food for man and beast, her weather is made to order for all sorts of exterior painting: absence of moisture, bright sunny days, very few flies and insects, all favor a condition that takes the speculation out of how your paint job will turn out.

If you are not prepared to do a complete job, you should at least put on a first coat, cover the surface with a preparation that will seal up all spots that have shown a tendency to chalk blister or peel.

For this purpose you will use Moore's First Coater, a product that has been developed by years of experiment to so thoroughly "seal up" all surface that no matter what happens underneath your finishing coats of paint will not be pushed out of place, but will stay on and fulfill their service of protection and beauty until completely worn thru by action of the elements.

Don't let anyone fool you with a substitute for Moore's First Coater, for there is nothing on the market that may be classed as a competitor. It is the only one that has won by actual test its right to first place.

Bring us your paint problems. We have the advice of experts on exactly how to meet every up-to-the-minute condition, and it will be given you cheerfully without cost or obligation. If you will allow us to put our finger in your paint pie we will help you to more service for less money.

**Don't be Dumb**

Tidex full-bodied motor oil does not make a lot of noise or extravagant claims from the pages of newspapers or magazines, but it does lubricate motors thoroughly and efficiently. And when you buy Tidex you pay for oil only, not a lot of printed pages that returns you no value.

We carry all grades of this oil; you may buy the heft adapted to your motor and the price is only \$1.00 tax paid for a two-gallon sealed can of SAE 30-40 or 50, only one shilling a quart.

The next time you pay 25 or 30 cents for a quart of loud spoken motor oil, just figure up your dumb streak and see how much it is costing you.
