W. ROBBINS

FIGURE THIS OUT!

Andover, N. Y.

During the past six years, Mrs. S has bought an electric washing machine, refrigerator, percolator, ironer and a radio. But her electric bills are only a few cents a day more

than they were some years ago. She's getting close to three times as much electricity as she formerly used, for almost the same price!

Mrs. S has five new appliances but her

electric bill is little higher than before

What's the secret? The cost of electricity is down. Whether you use much or little, you're getting more electricity for your money than ever before. And at twice the price, electricity would still be the biggest bargain you buy today. You can afford to use it freely.
