**Henry is a Gentleman**  
Carl Anderson in the current issue of the Saturday Evening Post, has given a new slant on the character of his cartoon hero.

Henry is hard boiled; he dominates, he exploits, he takes every advantage of circumstances but this time he faces a new angle of human relations, is first aggressive then dominant; sits down to think it over and yields to a proper impulse.

Many people are like Henry, particularly those who have to do with the mechanics of home making and under trying situations make themselves promises that are soon forgotten in the complex of other problems.

We dare to assume that there are a large number of housewives in Andover who do their cooking under conditions that are most trying; their cooking equipment is ancient, unpleasant to operate and disappointing in results and if they could only be brought to realize what good cooking stoves are being made today and how easily they may be owned, there would be a rush to possess them.

We have in stock a New Method Gas Range that has many features of excellence; the burners are spun steel, heavily enameled; their combustion of fuel is more perfect than is possible with a drilled cast burner and the flame is hotter; they pick out of place easily and may be kept as clean as your dinner plates. The oven also has this same burner construction and being fitted also with automatic heat control is perfect in its operation. Your baking of every sort will come out just as you wish.

This New Method Range is faster in production; it saves fuel. You need never spoil a baking of any kind, it is a beauty to look at and the price is now reduced by one-third.

We trade stoves, sell on weekly or monthly payments, or give a liberal cash discount. It may amaze you to know how easily you can come into possession of a really superior cooking machine; just ask us.

**Bits of Allegany County News**

Belfast old-timers talked a lot about seeing "Old Dobbin" and a top buggy being driven thru Main street one morning recently. The "old gray mare" is almost non est and has swung into the curiosity class while the roads are full of new cars. Those who cannot have the 1934 brand wonder how the gay drivers of the latest models manage to do it.

Fillmore, whose village water supply was abundant when some other municipalities were beginning to worry over what would happen to their aqua pura in mid-summer, now finds its reservoir lowering and patrons are being urged to stop using outside hose. Must we all come to using chlorinated and aerated Genesee River water, now especially poor with the stream as low as level on many old timers can recall?

Houghton's college president, J. S. Locket, has changed his plans somewhat for his European trip and will not sail from New York until August 10th. His son, Robert, is to accompany him.
