With Every Service

During these strenuous times the cost of a Burial Vault has placed it beyond the reach of many. The Wood Rough Box was used in the days of the horse drawn hearse. Now, we no longer use the wooden Rough Box; instead we furnish, AT NO ADDITIONAL COST, a strong outside metal Burial Chest made of Keystone Copper Rust Resisting Steel, Bronze Metallic finish.

This is part of our service and is included with , each adult burial without any additional cost.

For those who desire a Concrete Vault, we have to offer the double-sealed Blairsville Vault which in our opinion is unsurpassed.

Strength in Excess of **Burial Requirements**

The Mansfield Burial Chest has been proved to withstand loads in excess of burial requirements. It is of the box and lid type of construction—comprising but six parts, top and bottom, two ends, and two sides. Attractively finished inside and out with "Bronze-Metallic" finish.
