A FEW years ago, Mrs. L had only a few small electric helpers in her home. But by adding one or two new ones every year, she now has the wonderful convenience of an electric range, refrigerator, mixer, ventilating fan, washer and ironer. Yet here is the good news. In spite of all the extra electricity she now uses, her electric bills are only a few cents more a day than before!

You'll find, like Mrs. L, that the more electricity you use, the bigger bargain it is. With the reduced cost of electricity in this neighborhood, it's possible to use more and more electrical conveniences for a few cents extra a day.
