# Another Terror Eliminated

dentists' chairs used to be equipped with straps to soon thereafter as the age limit will permit. keep the patient from leaping out of the window when the dentist's instrument struck a nerve. Folks didn't will suffice if the proper program is maintained. couldn't be pulled by the fingers, were knocked out with a mallet and chisel!

American dentist named Horace Wells discovered, in 1844, that nitrous oxide, which used to be called "laughing gas," would render a person unconscious of pain—and everything else—for long enough to extract the most resistant molar. That was a great stride forward in human knowledge; and an even longer step tist, Dr. W. T. G. Morton, who discovered the anes-great size? thetic properties of ether in 1846.

unconscious by hitting them on the head, or strap them going to make tremendous fortunes. to the operating table and let them scream.

ders it insensitive to the pain of the dentist's drill. Dr. private flying. LeRoy L. Hartman, professor of dentistry in Columbia University, produced the formula after 20 years of when these get once established, their annual demand sheets. Do not scrape the saucepan, and in other ways. while it does not make a visit to the dentist exactly a the country. popular emusement, it robs the ordeal of many of its terrors "Thinless dentistry" is at last media worder all

#### Too Modest

TERHAPS you think there is nothing you can do for this community during the coming year. If so, you are modest-by far too modest.

property by inaugurating a weekly "clean-up" system. rise accordingly. You'll be surprised at the difference it will make. A few touches here and there often transforms a place.

can encourage him by complimenting him on the improvements he is making. He will feel that his work is appreciated by others and will be more disposed to money, but few do like they think they would. continue it. Then, again, he may pass this spirit of fraternity along with like results in other places. feeling and comradeship on the part of the people by neglected the little things.

simply extending a little of your own sunshine to those around you. another one to some other face.

How simple it would be to make an endless chain of these smiles and keep them perpetually on the move! in the home life of the community!

There is much that you can do during 1936-if you will. Modesty is commendable, but one should not! carry it to excess.

## Standard School Terms

THRUOUT the country, there is strong sentiment to ward standard school terms. Considerable discussion and inquiry concerning the matter shows conclusively that more people are coming to realize school terms should be alike the country over. Districts with short terms are angling toward the lengthening of these terms to conform with the average,

Many states in the country have laws concerning minimum school terms but unfortunately, several do 📑 not. Reports show that some districts in states with farm and home. If you enclose a appear. Many plantings are made for the purpose of conducting no laws regulating the length of the school term, have self-addressed, stamped envelope and too late in the spring for best re- insurance agency business in the

In considering the matter of the length of school will receive a direct reply to your production make for high yields." the style and assumed firm name of terms, it is important to remember that the ordinary query from the colleges.
