Talking About the Weather

States this Winter, but few people can remember them, higher than their source. seldom such prolonged cold spells and such a succession life in a few years. of cold waves.

forecasters are putting forward the usual variety of ly right and erudite in details. explanations which don't explain, and predictions which | She has this superiority, too, over other learned are more likely to be wrong than right. A favorite professions which the schools, colleges and universiexplanation for unusual weather conditions is that sun ties are teaching. Most of the others are scholarly in spots have something to do with them. But the theory only one thing. The good homemaker has to know at that the eleven-year cycle of sun spots affects terres- least a dozen things very thoroly, and not only know | trial weather, whether favorably or unfavorably, has them but be able to apply what she knows with her not been borne out by the records of the Weather Ru- hands. reau, which have been kept continuously in all parts of the United States since 1871.

that 1936 will be like 1848, which used to be referred to as "the year without a Summer" in the northern is that nobody knows enough about the weather and mains of a wreck. the causes of its violent changes to forecast it for more than a week or so ahead. Nevertheless, the weather is, always has been and always will be the most inter-wonder why the drug stores are full of patent mediesting common topic of conversation.

Japan's Unfounded Fears

THE foundation of a new naval armament race has been laid and it will soon get under way in many parts of the world. The blunt walk-out of the Japanese delegation at the recent limitation conference London killed all hope of any sort of armament pression for several years to come.

The now dominant military machine of Japan i
