## Food Market Advice

**TO HELP** celebrate the Fourth of July, smoked hams, chickens, cold cuts and frankfurters have been made especially attractive in price. Smoked tongues, too, are an economical purchase. These meats are all as good or better cold than hot, should picnic be contemplated.

Beef is still reasonable, lamb is somewhat lower, pork is firm and veal prices are steady. A variety of fish and seafood is available at reasonable prices.

**Melons Outstanding Value**  
Watermelon and the Fourth are inseparable in most people's minds and tho the season has been delayed it is reasonable in price. Other melons including cantaloupes, honeydews and honeyballs are plentiful and inexpensive.

Many kinds of berries are seasonable, and with the exception of cultivated blueberries and late strawberries, they are moderately priced. Freestone peaches are now abundant and reasonable. New apples have begun to be shipped but are not generally available. You may also choose apricots, cherries, plums or pineapples, not to speak of oranges and bananas, depending on your likes and appetites.

**Salad Greens, Beans and Carrots Cheap**  
Salad greens are plentiful and cheap, particularly nearby Boston, iceberg and Romaine or cos lettuce. Green beans are abundant, of excel-

lent quality and low in price. Nearly by carrots are now cheap, but California carrots cost more. Cauliflower is more plentiful and lower than it has been. Potatoes are still high and relatively scarce.

### Butter High, Eggs Reasonable

Butter prices have continued to rise until they are now seven and one-half cents over last year's at the same time. Storage stocks are low, production is low and consumer demand has increased. On the contrary eggs average two cents a dozen cheaper with an increase in both production and consumption. Cheese prices are firmer tho held stocks are considerably larger than either last year or the five year average.

Here are two Fourth of July menus made up of seasonable foods which are moderate in price.

(1)	Cream of Spinach Soup	Cold Chicken	Cold Sliced Ham
	Mixed Vegetable Salad	Tomatoes	Rolls and Butter
	Watermelon	Coffee	
(2)	Boiled Fresh Salmon	New Potatoes	Green Peas
	Cucumber Salad	Bread and Butter	
	Ice Cream	Cake	Coffee

## SAGAS OF THE SKIES

By R. C. Oertel  
Manager, Aviation Division, Sales Department  
Colonial Esso Marketers

**THE** Republican River was a raging torrent. Swollen by continued heavy rains, the muddy waters overflowed their banks and inundated the countryside. The rampant stream brooded trees and tore at the foundations of buildings until they toppled into the angry waters and were swept away. Towns along the course of the river in southern Nebraska were flooded. Farmers were marooned and some were drowned.

Near McCook, two men in a tiny, open boat fought death. Their frail craft was tossed about like a chip on the crest of the flood. With no ears to help them, all they could do was let the rushing tide carry them where it willed, while they did what they could to prevent the boat from being crushed and sunk by the logs and debris which constantly menaced them. Their plight was desperate and, as they confided later, they never expected to reach shore alive.

But out of the skies above the swollen river came a plane. The pilot and his observer spotted the two men in the tossing boat and circled above them. The pilot maneuvered his plane to nose it into the high wind and thereby attain a slow ground speed. Lower and lower the airman dropped his craft until it was less than ten feet above the water. From the cockpit a rope ladder was tossed over until the lower end of it touched the water.

Carefully and with infinite skill the pilot guided the plane so that the trailing rope ladder was drawn across the tossing boat. Harold Steinke, one of the two castaways, grabbed it as it came by and climbed aboard the plane. Again the pilot swung across the boat. This time M. R. Gillen caught it as it swung by and was pulled to safety. As the plane roared away one of the men looked back. He saw the roots of a great tree rise up under the empty bobbing boat. For an instant it hung, poised above the water. Then, with a sudden surge it fell sideways back upon the tide and sank.

You cannot invest 25c more profitably than in one of our Brief Business Bringers. Under 25 words 25c; over that amount 1c a word. Try selling that article thru these columns.

## Bread Making is no Dead Art in Allegany County

Because questionnaires to Allegany county families showed that over 40 per cent of the homemakers in those families make their own bread, the Allegany County Home Bureau has chosen bread-making as one of their eight projects for 1936-37. Mrs. Linnea Dennett, specialist from the College of Home Economics at Cornell University, is conducting district training schools for the local unit leaders this week.

Those who attended the meeting at the home-making rooms of the Wellsville high school are: Mrs. Emmett Morrison, Wellsville; Mrs. Geo. Forsythe, Whitesville; Mrs. Edward Northrup, Andover; Mrs. Dewey Brandes, Petrolia; Mrs. W. B. Wright, Scio; Mrs. Ed. Kelly, Friendship; Mrs. Edgar VanHorn, Alfred Station; and Mrs. Mingus, Independence. Other meetings are being held at Fillmore and Cuba.

Most of the women attending are already accomplished bread makers. A large part of the meeting Monday was devoted to a discussion of the history of bread, and scientific reasons for making bread according to certain rules. It was discovered that the most common mistakes are "hurrying" the bread by putting it to rise in too warm a place, and allowing too short a time for baking,

resulting in pale, poorly shaped loaves of uneven texture. Whatever faults may sometimes appear in the hurry of a homemaker's day, the results at the training school were uniformly successful. The products showed all the good points of well-baked bread, including a rich golden-brown crust, good flavor, smooth velvety texture and relative lightness of loaf as compared to size.

## A DISH FOR THE WEEK

When the temperature soars, a refreshing fruit drink such as spiced orangeade, served with meals or between meals, is a healthful and pleasing way to revive lazy hot weather spirits.

**Spiced Orangeade**  
1 cup of cold water  
16 whole cloves  
1-inch piece of stick cinnamon  
Colored rind of 1/2 orange  
1/2 cup of sugar  
1 cup of orange juice  
2 tablespoons lemon juice  
1 pint of cold water or charged water

Crushed ice.  
Put one cup of cold water, the cloves, cinnamon and orange rind in a saucepan; simmer this for five minutes, add sugar, and stir until

the sugar is dissolved; then boil for two minutes. Cool, strain and add fruit juices. Just before serving, add charged water, or cold water, or ginger ale and crushed ice.  
**Suggested Menu**—Cold cuts, potato chips, tomato jelly salad, hot rolls, fresh cherries, sponge cake, spiced orangeade—for adults and children.

## why the SILENCE of Electrolux is YOUR ASSURANCE OF LONG SERVICE AT LOW COST

**THE** SILENCE of Electrolux is a definite advantage in itself. But it is also far more than that! It is constant proof of the basically different method of Electrolux operation. Electrolux has no machinery. A tiny gas burner takes the place of all moving parts... circulates the refrigerant, which is cooled by ordinary air.

It is this complete absence of machinery which makes possible the lasting efficiency obtainable only in Electrolux refrigerators. When you purchase an automatic refrigerator it makes very little difference to you what the operating cost may be for the first month or two. It makes a great deal of difference to you what the operating cost may be month after month for 5 years, 10 years, or longer. Every other automatic refrigerator loses efficiency as its machinery wears. Electrolux has no machinery to wear and its low operating cost remains permanently low throughout its long life.

Many people ask how long an Electrolux will last? We have to answer that we do not know. The first Electrolux

refrigerators that we sold 8 years ago are operating today just as quietly, economically, and satisfactorily as the day they were installed, and there is no reason to believe that they will not continue to operate just as well for many more years, so there is no definite answer we can give to the question. It may be that 10 or 20 years

may pass or even longer before we know how long an Electrolux refrigerator will last. You can be certain of the lowest possible yearly cost only if you purchase Electrolux. Come in now and select the size you need and begin to enjoy the comfort, convenience, and economy of gas refrigeration.

New Air-Cooled ELECTROLUX THE SERVEL Gas Refrigerator

## ELECTROLUX COSTS far less to operate than any other refrigerator . . . . .

and costs no more to buy than other automatic refrigerators of comparable quality. Naturally you will not compare the price of Electrolux refrigerators with the second or third grade models put out by some makers, but you will compare Electrolux prices with the first grade lines of a few of the better manufacturers.
