TITORLD peace is a beautiful thing, but before v I spend too much time in dreaming of the peace peace at home.

inal element and respectability. Murderers, bank robbers, mail looters, hold-up

element is becoming so bold and so powerful and i solent as to constitute a distinct menace to the future sincere. of law and order and decency in this country. the activities of the criminal element by the so-termed

"big game" and the less important crimes too often Ireland, five from Grmany and other countries one to go by with the perpetrator unpunished. Probably the most alarming phase of the whole

unsavory mess is the facility with which these gangsters escape punishment. It is easier for a murderer purpose so far as they are concerned, and they have no or a hold-up man to manufacture a ficticious alibi further interest in it. than it is for a decent man to kick the cat. And there is always someone ready and anxious to aid him in perjuring his neck out of the noose. It is getting to the point where country towns COMMUNITIES grow only in proportion to the sur and rural communities are vitally interested in

with criminals it is inevitable that many of them will ing their money or buying the necessities of life branch out into the smaller communities in search of other localities. fresh prey.

suppression of the horde.

refreshing sleep which country people enjoy.

### Crossing Accidents Continue

IN spite of the many campaigns of warning and forts to educate automobile drivers regarding the necessity for approaching railroad crossings carefully. the death toll exacted of carlessness continues. The price is often paid by the innocent and helpless passengers in the machine or other motor vehicle. |'

The man at the wheel of a speeding motor often!, fails to appreciate the grave responsibility he assumes | reckless speeder is also true of the driver who tries your good will. to beat a train at a crossing. All too often, it is not alone the lives of such drivers and their passengers | that are sacrificed to crimnal folly, but trains are portunity to serve you, from a sound economic viewpassengers.

Several states have attempted to curb the crossing demon, by laws requiring a full stop at all main line crossings. There are many objections to these regulations. One type of official post clothed with police authority made a practice of taking the num-ducks before most of us can open the door. crossings where they lay in wait for luckless motorists, whom he haled before roadside courts. This practice became the regular business of fee officers in certain sections of the country and in several states the stop law was abolished on this and the additional than old age. ground that the danger of stalling on the tracks was enhanced by the full stop required.

Of course, the gradual elimination of grade cross- sive kind of suits to have, and they can't be dry cleanings is the only effectual solution of the proble. Until that can be accomplished the good sense and fairness of motorists - fairness not only to -themselves, but to those who ride with them and to the harassing cise, but whoever saw a doctor outside of an automo. engineers of fast trains and to the human freight they bile? bear - must be relied upon to cut down crossing fees. And human nature being what it is, that is

## Getting Accurate Time

THERE and how does correct time originate? Have you ever wondered? One outstanding source is an observatory atop a giant skyscraper in New York City,

the only one of its kind in the world.

No new planets in our solar system will ever be discovered by this observatory, and no great stars millions of light-years away in the universe will ever be seen through its telescope. For observations of neither planets or stars is the object. It is interested

At regular intervals the telescope in the observatory is trained along the meridian, that imaginary d straight line between the poles, and when the star "mean" time is ascertained. And this is called side-Farm crops are beginning to suffer in many re- real time, or the time of the stars. In minutes and ning and then three minutes and 55,555 seconds are
