#### Money for Health

can buy immunity from all the ills that flesh is heir to. average year. Yet hail is a minor item among weather "Many methods have been applied to in Edward J. Atwood's hardware. But certainly we spend more today for health than any visitations. generation in history, whether we get it or not.

Less than 30 per cent., they say, of money spent "order of magnitude."

In New York, the patronage of the free hospitals increases considerably faster than does the population. These are signs of change but not necessarily of progress. It is by no means certain that state medicine will mean better medicine or that the familiar abuses of official authority can be kept away from the important problem of the public health.

Those who have known the friendly and sympakindly at the prospect of a state department of medicine which puts him out of business.
