

The Advancement of Science

(Continued from Page Three)

Proof III.

During the destructive vibration soil gas dust storms, epidemics of measles were frequently precipitated due to the blood disintegrating soil gases accompanying these storms. The measles epidemic during these storms, reached its peak in the United States in 1933-34. The measles epidemic have on several occasions accompanied these destructive vibration soil gas dust storms.

Asthma

The blood disintegrating soil gas dust settling to the earth during precipitation, a heavy long rain near Chicago, produced a severe epidemic of asthma in the summer of 1935.

Precipitation

During precipitation in 1935-36 at the close of the four year drought period, the drought soil gas dust settled to the earth in a very noticeable manner as evidenced by its odor.

Pneumonia

Pneumonia in Buffalo in the winter of 1935-36 reached its peak due to the continued prevalence of my blood disintegrating atmospheric gas groups. The unusual prevalence of blood disintegrating gases was due to lack of sunshine, increased humidity, atmospheric static and conditions precipitation of some sort occurring nearly every day. This winter, according to the weather bureau, was the most unusual winter on record.

THE PHYSICO-CHEMICS OF DESTRUCTIVE VIBRATIONS

Airplane

The vibrations from airplanes are a series of violent concussions. The violent concussions of airplane vibrations exert an aspirating vacuum pump like action. The aspirating vacuum pump like action of airplane vibrations has caused a rapid absorption of earth surface moisture and ground gases causing a drying of wells, lowering of streams, lowering of lake levels, reduction of humidity. The rapid absorption of earth surface moisture has prevented the formation of organized mature vital vibrating fog colonies. These vibrations have also caused a reduction in earth's normally weak gravity hold on fog and cloud colonies, also hastened a loss of cloud colonies into spaces. Vacuum-like vortex of frozen nitrogen, constantly drawing them from the earth. The aspirating vacuum pump action of the airplane violent concussion vibrations are also evidenced in a most gruesome manner by the billions of tons of destructive vibration drought soil gas dust storms aspirated into the atmosphere and carried all over the world.

Radio

The powerful dynamo generated electro magnetic radio vibrations that instantly and constantly circumscribe the earth like a cover to a ball also exert an aspirating vacuum pump like action upon surface moisture and gases.

The powerful radio vibrations are incompatible with the vital vibrations of the atmosphere's gases. Radio vibrations interfere with the normal diffusion of atmospheric gases. Radio vibrations disintegrate organized, mature, vital fog and cloud colonies.

Loss of Fog and Cloud

The combined violent aeroplane concussions and radio powerful dynamo generators radiant energetic destructive vibrations terminated in 1930 in (1) the loss, (2) the permanent perversion and (3) the infliction of the atmosphere's vital complex with destructive vibration malignancies.

Drought

The destructive vibration drought period 1930-1934 would have continued until all life was exterminated had it not been for the billions of tons of drought soil gas dust pumped into the atmosphere. The destructive vibration drought would have continued letting the moisture that the destructive vibrations pumped from the earth's surface go directly into space's vacuum-like vortex of frozen nitrogen until all life was exterminated through famine, extreme electro dynamics and extreme thermo dynamics.

Temporary Abatement

The extermination of all life as above mentioned, due to destructive vibrations, was temporarily abated in 1935 and 1936. The temporary abatement is due to the billions of tons of drought soil gas dust pumped into the atmosphere. The drought soil gas dust mixed with the atmosphere's smoke, atmosphere destructive vibrations disintegrated cloud, fog gases and the enormous quantities of moisture aspirated into the atmosphere by destructive vibrations.

Artificial Clouds

These destructive vibration artificial clouds saturated with misting water vapors drifted about at low altitudes. The rapidly drifting non-vital artificial misting water-soaked clouds drifting over a low atmosphere pressure area deposited their misting moisture in torrential rains.

Vacuum Pull

The artificial non-vital clouds depositing their moisture in torrential rains acted as a vacuum in pulling neighboring malignant misting water-soaked clouds to the flooded area.

Lightning

Lightning was of unusual severity in eastern central New York during the torrential rains, 1935 and 1936. The severe lightning was due to the explosion of the ground soil gas dust explosive gases. The severe lightning increased the torrential rains.

Buffalo

The Buffalo area in 1935-1936 escaped the torrential rains. In Buffalo, 1935-1936, the artificial malignant clouds floated at a low altitude, hither and thither. One layer of malignant clouds would often float under another layer higher up.

Rain Drops

The malignant, artificial destructive vibration clouds drifting over Buffalo at a low altitude, often deposited large drops of rain, misting rain or a short shower.

Lightning

There was scarcely any lightning in Buffalo June 1935. Lightning occurring in Buffalo, summer of 1935 was extremely severe. The thunder clap following the lightning was often delayed unusually long. The delayed thunder clap was another evidence of the malignant nature of the artificial clouds.

Thermo Dynamics

The extreme temperatures in the Buffalo area during the destructive vibration era have been due to first, loss of atmosphere vital complexities; second, refrigerating atmosphere cloud gases; and third, radio destructive vibrations, wave-lengths. Radio vibrations at any wave length exert a blood temperature raising effect.

Cloud Drops

On five different nights in Buffalo, malignant destructive vibration artificial clouds dropped to the earth's surface in the form of a dense misting atmosphere. The cloud drops resembled dense fogs.

Loss of Fog

The loss of organized, mature, vital vibrating fog colonies is very evident. Mature, organized fog colonies are baby clouds. The loss of mature, organized fog colonies hastened the destructive vibration loss of the atmosphere's mature organized cloud colonies.

Loss of Clouds

The destructive vibration loss of organized mature cloud colonies, occurred in 1930 and continued until 1935, at which date the artificial clouds, as above described, made their appearance.

Clear Sky

The artificial clouds drifting away from areas in the Buffalo district 1935-1936 would bring to view a white ceiling of high altitude, composed of gases from destructive vibration disintegrated cloud colonies. The white ceiling composed of destructive vibration disintegrated cloud masses of gases would occasionally separate and drift away bringing to view the deep blue stratosphere of frozen nitrogen.

Drought

The abolishment of aeroplane and radio destructive vibrations will be followed by a world-over prolonged drought. The people of the earth must be prepared for this world-over drought following the ten year armistice, 1940-1950. The world-over drought following the beginning of the ten year armistice will be due to the loss of the aspirating or pump-like action of both aeroplane and radio destructive vibrations, drawing enormous quantities of moisture into the atmosphere.

Desert Age

If the ten year armistice is not effective, 1940-1950, in 1945 or 1950, destructive vibration weather conditions will continue to progressively grow worse as they have during the 20 year destructive vibration era become unbearable. The people of the earth, recognizing the cause, will become hysterical and clamor for the immediate world-over abolishment of destructive vibrations. Destructive vibrations will then immediately be abolished all over the world. The abolishment of destructive vibrations in 1945 or 1950 will be followed by a world-over desert age for which there will be no remedy.

Life's Only Chance and Faint Hope

Life's only chance is a ten year armistice, effective world-over 1940-1950.

Life's Only Hope

Life's only hope is that the ten year, armistice will permit the reformation of organized, mature, vital fog colonies or baby clouds. These organized cloud colonies or baby clouds will afford life its only hope. Life's only hope is that these fog colonies or baby clouds will generate new, mature, vital, vibrating cloud colonies or the atmosphere's vital complexities, without which life's vital vibrating complex cannot exist.

Suggestion

Immediately world-over abolish destructive vibrations and establish for the short time that life can now exist at the longest, owing to the permanent damage destructive vibrations have done to atmosphere earth vital vibrations. Establish a world vital vibration Protectorate. A world farm, garden, forest scientific guide or Boards of Health, Health Commissioners and General Practitioners the world over that have mastered the physical and chemical origin of sickness, the physico-chemicals of destructive vibrations and the science of vital complexities to guide the people of the earth away from trouble.

End of All Life

The rapidly approaching end of all life through the loss, the permanent perversion and the infliction of the atmosphere's vital complexities with destructive vibration malignancies is evident in a most positive, gruesome and appalling manner by:—

1. The dead orchards, killed by the extreme cold winter 1933-34.
2. World over regional droughts, 1930-1934.
3. Periodic world-over torrential rains.
4. Adverse, extreme, unseasonable, freakish weather conditions that have constantly prevailed and are progressively growing worse throughout the 20 year destructive vibration era.
5. The drying of wells, lowering of streams and lowering of lake levels.
6. The loss of organized vital vibrating mature fog colonies.
7. The loss of organized vital vibrating mature cloud colonies.
8. The loss of the atmosphere's vital complexities of organized vital vibrating gas colonies without which life cannot long exist.

Definition of My Vital Complex

Vital, thermo-electric dynamic organized groups of oscillating rotating, revolving, electron, proton, photon, neutron, colonies vibrating at certain definite, vital, wave lengths, tone, pitch, quality, frequency, volume and force.

Greatest Enemy

The greatest enemy of my vital complex is destructive vibration. Aeroplane, radio and similar gigantic destructive vibrations.

Destructive vibration disturbances of my vital complex manifested:—

- (a) Meteorologically, as above described.
- (b) Clinically, as described in the chapter on The Physical and Chemical Origin of Sickness, giving the change in sickness during the destructive vibration era.

Scientific Laws

Scientific laws that make aeroplanes, radios and similar gigantic destructive vibrations, life's greatest and most mysterious deadly enemy unisance.

I. Vital Complexities

Universal atmosphere, earth, life, vital, vibrating complexities are a temporary, transient, result of universal destructive vibrations becoming for a short time vital vibrations.

II. Natural End

Universal, atmosphere, earth, life, vital vibrations will normally in a comparatively short time end all life by again becoming a part of universal destructive vibrations.

Aeroplane, radio, dynamite explosions and similar gigantic destructive vibrations are rapidly hastening the normally slow, but eventually inevitable, return of vital vibrations to universal destructive vibrations an affair that will end all life for ever.

III. Slow Formation

The rotating, destructive, vibrating earth revolved

around the sun billions of years before destructive universal vibrations became vital vibrations or the atmosphere earth vital vibration complexities formed.

IV. Never Return

When the earth atmosphere vital vibrating complexities return to universal destructive vibrations as it normally eventually will do, they never will return to vital vibrations, thus ending all life for ever.

V. Gravity Hold

The earth's gravity hold on the atmosphere's vital vibrating complex is normally weak. The earth's weak gravity hold on the atmosphere's vital complexities will normally eventually and inevitably permit the loss of the atmosphere's diminutive twelve miles of vital vibrating gases that will sustain life without added oxygen. This loss of the atmosphere's vital complexities will end all life for ever.

VI. Artificial Destructive Vibrations

Artificial Destructive Vibrations are rapidly hastening the loss of the atmosphere's vital vibrations. Also the loss of the atmosphere's vital complexities directly into space. Thus, destructive vibrations are in two ways rapidly hastening the normally slow, but eventually inevitable loss of the atmosphere's vital complexities.

VII. Lifeless Journey

After the loss of the atmosphere's vital complexities, the earth will begin its rotating, revolving, billion of years lifeless journey around the sun before it returns through earthquakes, volcanic eruptions, lightning, extreme thermo-dynamics extreme electro dynamics to the destructive vibrating universal gases from which it formed.

VIII. Artificial Loss

A ten year world over armistice of aeroplane, radio and similar gigantic destructive vibrations will tell whether the atmosphere's vital complexities, now lost through aeroplane, radio destructive vibrations, as they have been since 1930, will ever return to normal.

IX. Delicate Mechanism

The atmosphere's vital vibrating complexities that created and sustained life's vital vibrating complexities is a delicate mechanism. The delicate mechanism of the atmosphere's vital complexities upon which life's vital complexities momentarily depend is evidenced by the fact that we can live but from three to five minutes without oxygen administered to us at a proper oxygen, nitrogen gas tension. This is demonstrated by the fact that when we get at an altitude of eight to ten thousand feet, oxygen has to be supplied to sustain life.

X. Ozone

The Smithsonian Institute has shown that the ozone layer ten to forty miles in the atmosphere as reported in their bulletins in the May Geographic Magazine, shows that all life depends upon this ozone layer. If the ozone layer were a little thicker than it is, it would shut out the long ultra violet rays of the sun that contain the vitamin or life giving rays essential to all life. If the ozone layer was a little thinner than it is, it would permit the short ultra violet sun rays to reach the earth's surface. These sun short ultra violet rays could blister and blind until all life was exterminated. The disturbance of the ozone layer by aeroplane and radio gigantic destructive vibrations cannot be avoided.

Wise Guy

A wise guy will not monkey with his Creator and sustainer.

Crisis

The world has reached a destructive vibration crisis. A crisis that demands world united effort of the best talents. A world over crisis that demands: A knowledge of the Physical and Chemical Origin of Sickness. A knowledge of the new scientific era. The Science of Vital Vibrating Complexities. A college of vital complexities. A college to teach the new text book on The Physical and Chemical Origin of Sickness and the destructive Physico-Chemicals of Vibrations.

Boards of Health

Boards of Health that possess a knowledge of the above enumerated subjects, health physicians and general practitioners that can recognize the physico-chemicals of destructive vibrations. World Over Boards of Health, Health Commissioners and General Practitioners possessed of this knowledge will constitute A World Vibration Complexities Protectorate. A scientific guardian to the scientific world.

Needed

A world farm, garden, forest, scientific employment guide. Also weekly open forum meetings all over the world to teach and study the new text book on The Physical and Chemical Origin of Sickness.

I have begun holding open forum meetings in Buffalo.

Winter 1935-1936

During the winter of 1935-36, the atmosphere smoke and artificial destructive vibrations drought soil gas dust aspirated atmosphere water vapor mixed with destructive vibrations disintegrated cloud gases and other gases and dusts of the atmosphere, these malignant clouds rapidly moved about with a low altitude ceiling.

Diminished Sunshine

The malignant atmospheric gas cloud-like colonies rapidly moved about at a low altitude thus diminishing the sunshine in Buffalo.

Precipitation

The malignant clouds with their saturated misting moisture moving rapidly about deposited a trace of precipitation nearly every day, winter 1935-36.

Refrigerating Gases

The winter of 1935-36 malignant cloud colonies of gases exerted a refrigerating effect. This combination gave in Buffalo the most cloudy, most precipitation, greatest average cold for any winter on record according to the Weather Bureau.

Pneumonia

The winter of 1935-36 saturated the Buffalo atmosphere with my blood disintegrating atmospheric gas groups. These blood disintegrating gases clinically manifested themselves with the highest pneumonia mortality Buffalo ever had.

Ceiling Drop

May 17, 1936, the atmosphere ceiling on a clear day dropped to the earth with a strong wind in the Buffalo Depew, Lancaster area. The wind had a descending current causing the smoke to settle to the earth. The atmosphere ceiling drop carrying its stifling drought soil gas dust and other stifling atmosphere ceiling gases to the earth's surface.

These atmosphere ceiling stifling gases with the surface smoke, sewer gases, ground soil gases and other stifling gases produce a dense smoky vapor stifling mixture of blood disintegrating gases. These gases were very suggestive of the approaching end of all life.

MISSING LINKS

My forty-one year chain of missing links in the Physical and Chemical Origin of Sickness, offers the people of the earth their only opportunity to prevent the premature extermination of all life, in the most cruel manner imaginable thru complex physical, physico-chemical and chemical sickness, famine, starvation and insanity due to life's greatest and most mysterious enemy, destructive vibrations, by immediately obtaining the world over ten year armistice of aeroplane, radio and similar gigantic destructive vibrations.

Chemical War

The world chemical warfare demonstrated that blood disintegrating gases in the open atmospheric air will produce epidemic sickness, also sudden death.

Ground Gases

There is no known poison gas that does not at times and in certain locations form upon the earth's surface, in the earth's pores, holes, caves or mines. A familiar example of a ground gas is our natural fuel gas.

Swamp Gases

Swamp gases are composed mostly of the deadly methane sulphurated hydrogen and other poison gases from decomposing organic matter similar to our deadly sewer gases.

Swamp gases disintegrate the blood precipitating malaria fever, yellow fever, dengue fever, other fevers and asthma, the same today as they have through all time.

Gas Mask

The efficient gas mask won the world chemical war. Every English subject has been furnished by the wise English government with an efficient gas mask, according to the newspapers.

If so, the English citizens can easily demonstrate that my blood disintegrating groups of atmospheric gases, precipitate at least 33 1/3 % of all sickness, by preventing sickness due to these gases through the use of the gas masks.

Scientific Laws

Scientific laws never change. Theories and fads come and go, but scientific laws never change.

Life cannot exist without a blood stabilizing, vital, vibrating earth, atmosphere complex.

A scientific law that is now being demonstrated in China with 15 million starving.

Boards of Health

The people of the earth have reached the scientific age that must immediately be governed by scientific Boards of Health or all life will soon be exterminated, through complex physical, physico-chemical and chemical sickness, precipitated by destructive vibrations.

Gas Test

The most sensitive test for blood disintegrating atmospheric gases is the asthmatic's unstable blood. The Board of Health must therefore be composed of chemists, physicians, farmers and asthmatics.

The Board of Health chemist should make a daily chemical analysis of the atmospheric gases. The chemical analysis should be made by taking a two gallon jug full of water at 3 A. M. every morning, to the middle of a field at least of ten acres. The jug should then be inverted at a distance of two feet from the ground and let the water run out. The water running out of the jug will cause the jug to fill with ground soil gases. The jug should then be tightly corked and taken to the Board of Health chemical laboratory for an analysis.

Silo Gases

Sudden death of second day silo fillers demonstrates the ability of decomposing vegetation to generate blood disintegrating gases.

Wells and Mines

Sudden death from entering certain wells and mines demonstrates the ability of certain ground gases to disintegrate the blood.

Synthetic Reason

Enough scientific data has been collected so that Boards of Health, skilled in physico-chemical research and trained in accurate synthetic reasoning, is all that is needed to prevent the premature extermination of all life.

THE KEY

The key to the mysteries of physico-chemical sickness was my unstable blood complex.

Unstable blood complex susceptibility.
Unstable blood complex colloidal shock.
Unstable blood complex idiosyncrasy.
First announced 1899 and 1901.

My unstable blood complex susceptibility has been buried by Richet's Anaphylaxis, 1902-1913 and Von Pirquet's Allergy, 1906.

My unstable blood complex discovered in 1899 and 1901, is a functional, hereditary complex, constituting a definite, clinical, hereditary entity, in heredity it follows the Mendelian Law, parent asthma, offspring, eczema, migraine, rheumatism, angio edema, giant urticaria, hives, gout, arthritis, anemia, granulopnea and functional viscerovascular crisis.

Richet's Anaphylaxis is a stable blood, rendered unstable by first, hypodermic injections of a raw protein. Richet's Anaphylaxis is a pathological unstable blood complex, that is not hereditary.

Von Pirquet named Richet's pathological unstable blood complex "Allergy" in 1906.

Allergy means a changed blood.

Functional allergy or allergy not induced by hypodermic injections of raw proteins, is but the manifestation of my previously discovered unstable blood complex.

Priority

My unstable blood complex first announced in 1899 and 1901, Richet's Anaphylaxis, announced in 1902 and 1913, establishes my priority.

Allergy meaning change is another name for my previously discovered unstable blood complex.

A demonstration of physical sickness was seen during the heat wave in the United States, July 1936. Deaths in these cases were of course due to the heat, aggravated by aeroplane and radio destructive vibrations.

July 26th, 1936, the newspapers report a death increase of 65 % caused by heat, 12,183 people die in 86 large cities.

China

Vast areas have no food, 15,000,000 famine deaths threatened.

How long will it be before what is occurring in China today, will occur in the United States?

The ten year armistice will show how near the world was in 1936 to China's condition.

Life's Only Chance

Life's only chance to prevent the extermination of all life through complex physical, physico-chemical and chemical sickness due to aeroplane, radio and similar (Please Turn to Page Seven)
