gigantic destructive vibrations, is the immediate ten year armistice and advancement of science by the adoption of the Physical and Chemical Origin of Sickness.

Chemical Viruses

It has been demonstrated that chemical viruses or destructive crystals cause infection as shown by the following quotation, taken from the Buffalo Evening News, January 24, 1936.

"Crystals Cause Disease — Plant Mosaic Previously Laid to Living Germs Entirely.

"Princeton, N. J., Jan. 24. — Non-living crystals of definite chemical composition, like the protein in our food, assume the guilt for causing disease, hitherto attributed only to living "germs" as a result of fresh scientific evidence unearthed by Dr. W. M. Stanley and Dr. H. S. Loring of the Rockefeller Institute for Medical Research laboratories near here.

"From sick tomato plants, suffering from mosaic disease, the scientists isolated crystals of a protein substance that has the same chemical, physical and biological properties as the protein crystals they previously found guilty of causing mosaic disease in tobacco plants.

"The newly discovered evidence is of wide importance. It relates to the problem of viruses, such as cause both the mosaic disease of plants and various human diseases like infantile paralysis. Scientists have thought that these viruses were living organisms."

The New Scientific Era

This new scientific era will be demonstrated to every person on earth and recognized as a most important era in the life history of man in less than ten years after announcement to the public.

Automatic Proof

The physical and chemical origin of sickness will be demonstrated to every person on earth by the scientific, educational application of indicated gas filtration, occlusion and revitalization methods, in the prevention of air sickness or 33 1/3% of all sickness due to my blood disintegrating gas groups.
