C. H. Watson Heard From

Ralph Shaff received a card Tuesday from C. H. Watson from Harrington Harbor, P. I.; Canada, written Christmas Day. It read in part: "From out this frozen north we send sincerest greetings to all our far-flung friends, and know you and yours are among that host. Terrible weather has delayed mails here and the last we have heard from home is dated November 12. We hear that 2,000 pounds of mail for the coast is waiting in Quebec and will start as soon as dogs can travel."

WITH basketball the only winter sport in our fair village, we can't understand what's the matter with the local fans. Several years ago, when Andover didn't have half as good a team as they have today to represent our town, the fans would flock up to the high school and holler their heads off, but now they just don't seem to give a hang whether we have a town team or not. The local Keystone team, composed of all Andover fellows, has incurred quite an expense in getting organized and have been playing ace-high ball all season, but about the only audience turning out is the subs on the team. No team, whether basketball or any other kind can keep going very long on that kind of support, so we would suggest that instead of spending four or five times as much dough seeing a game in Elmira or Buffalo, that the Andover boys get a break, and if the game is played anywhere nearly as good as those we've witnessed when the Keystoneers played this season, we can vouch for the audience getting full value for the time and cash expended.

IT WOULD seem that the Florida novelty stores must be running low on postcards, if the increased postage at the local postoffice is any indication. And what pretty cards (oh my!) Perhaps it's the climate down there, but "Phil," "Tut" and "Johnny" have kept the village on the cheery side for the past week or so and we just don't know what to expect next when we go for the mail. But keep the good work up, fellows.

IT'S marvelous what some people will do for publicity. We have been wondering if anyone in this section will make such a fuss over the line on the bottom of the 1938 license plates as some people have. It seems to us anyone squawking about the ad is a mighty poor resident for any state to have. The ordinary motorist goes out on the road every day and breaks at least one or two traffic laws before he gets home. And anyone putting up a holler or covering any part of the plates should receive special attention from the State cops. They would soon be glad to show their appreciation of being able to boost their own state. If any wants to give away their plates because of this line, we will be glad to accept them.

PLUMB HATCHETS  
Plumb Hatchets are drop forged from one solid piece of Plumb special analysis steel. Fine in grain, harder, tougher, this steel takes a hard keen edge. You can grind and grind a Plumb Hatchet and still have cutting steel on the edge.  
"Hang" in a Hatchet has to do with the relation of blade to handle, as well as the proportions of the head and the manner in which the weight is distributed. The handle of the Plumb Hatchet is shaped to conform to the natural close of the fingers, not the tight gripping which tires and cramps the hand. Each straight grain young hickory handle must be able to stand a strength test of a 400-pound weight dropped upon the neck. The Plumb Hatchet is the only one which gives an easy, positive method of retightening the handle when it loosens. The patented Take-up Wedge requires only a turn to keep a Plumb-handle safe and tight.  
Plumb Tools are superior in quality and the prices are reasonable and economical in the long run.

HACK SAWS  
A handy tool to have around. You may have a good one for 25c and it will be worth that to you for just a few minutes work.
