in the same breath.

many people are trying to get rid of it.

but we forget all about the good ones.

## Transportation is Civilization

"RANSPORTATION," wrote Rudyard Kipling, "is civilization." That sums up the story of mankind's progress from barbarism to whatever degree of culture! human race has reached. Transportation—easier, rter and speedier ways of getting people and goods from place to place—is the foundation upon which our

The story of the development of transportation is

fascinating. Men learned first to build boats and to: row them. They harnessed the wind to their boats and inavigation made neighbors of peoples separated by seas and lakes. Trade began. On land, men tamed rode wild animals, horses, camels, elephants. Then Class. someone invented the wheel, and modern land transportation began. The American Indians had no wheels. They gave way before civilization which had better

Civilization's latest development in transportation was right in the nosey stage of the worst cold I'd had is in the air. Alone among the methods of moving in years. Since then, when I talk about colds it's from place to place, aviation began its greatest develmostly on taking care of 'em after you get 'em. That's opment as an engine of war. The ancient Romans built great highways thruout Europe so that their "It's always been awful confusing, this question armies might move swiftly and keep the conquered by the pastor. of the cause of colds-but here lately it's been sort colonies in subjection. Today the nations of the world Bible school following the church day.
