## What Do You Know About Health?

By FISHER BROWN and NAT FALK

1. WHAT IS THE DIFFERENCE BETWEEN AN OCULIST AND AN OPTICIAN?

2. HOW MANY ANIMALS GIVE MILK FOR HUMAN CONSUMPTION?

3. WHO WAS DOROTHEA LYNDE DIX?

**Answers:**  
1. An oculist is a physician who has specialized in the study and treatment of the eye. An optician is one who makes or deals in optical goods. He is not a physician.  
2. Besides the cow, eight other animals give milk for human consumption. They are: goats, reindeer, yaks, zebras, buffaloes, llamas, camels and sheep. In this country, cow's milk is used almost exclusively.  
3. An American woman who, during the 19th century, started in this country a movement to help the insane. She made an exhaustive inquiry into the treatment of the insane, first in Massachusetts, and later in practically every state of the Union. She was responsible for the first state legislative act ever to be passed to assist the insane.
