Issues Warning On Flea Beetle Attack

Insect Appears Suddenly And Works Fast, Freding On a Wide Variety of Plants.

A tiny, plump, shiny black insect, exceedingly active and with a hop that is so characteristic of the movements of a flea as to give the insect the very appropriate cognomen of "flea beetle," will soon make its appearance in vegetable and flower gardens thruout the State, if it has not already arrived, says Dr. H. C. 1 Huckett, entomologist at the State Experiment Station at Geneva.

The insect itself is so small that it may not be easily recognized, but after a few days in the garden i will make itself known by the riddled appearance of the foliage of the plants on which it feeds, which soon looks as the it had been riddled with shot.

Flea beetles feed on a large variety of plants, but are most troublesome on cucumbers, potaotes, tomatoes, egg plants, radishes and cabbage, and are believed to be responsible for the spread of certain plant diseases, says Dr. Huckett. In July and August a second brood may play havoc with potatoes, tomatoes and egg plants.

Fortunately, flea beetles dislike leaf surfaces covered with any foreign material, such as sprays dusts; and if treatments are made before serious injury occurs and i the leaf surfaces are thoroly coated, the insects are easily held check. Since the adults appear sud denly and work fast, it is important to keep a close watch on the garden to detect the first signs of invasion. Calcium arsenate in bordeaux mixture is regarded as the safest and most effective spray, while tobacco dust with lime or a calcium arsenate and monohydrated copper sul fate dust with lime are recommended among the dust preparations.

The County American Legion has accepted the invitation of Friendship Post No. 1168 to hold the annual County American Legion convention in Friendship. The date has not been definitely set, but it is understood it will be early in July.

Clothes moths in all stages of development are usually killed by using one pound of paradichlorobenzene flakes to every 100 cubic fee of tightly closed closet space. A hundred cubic feet would be a closet about 8 feet high, 4 feet wide, and

with ELECTROLUX

Year after year, you save more money with Servel Electrolux, the gas refrigerator. For this reason: Servel Electrolux has no moving parts in its entire freezing system. Nothing to wear or become inefficient, nothing to cause costly upkeep or running expense. And that simplicity means that the gas refrigerator will always be silent, too, for there's nothing that can make noise. Call at our showroom today and get full information about this different refrigerator.
