## AND WHY?

Special to the Andover News

The Andover News has arranged with the Office of Information of the New York State Colleges of Agriculture and Home Economics to lanswer questions about problems o. farm and home. If you enclose a self-addressed, stamped envelope and mention the name of this paper, you will receive a direct reply to your query from the colleges. Do not) lask more than one question in one letter or on one postcard. Ask as | many questions as you like, but, make each one a separate communi-

Weeds Harbor Diseases? D. L. asks: "Please tell me if it's)

true that weeds spread plant dis-G. H. M. Lawrence of the bot-'any department replies: "Yes, it i

ue that weeds harbor plant dis-

"Most people think weeds are harmful only because they choke out other plants, but another serious charge against weeds is that they harbor various plant ills that are contagious, so to speak. "One weed may be host to one of disease and another week be host to another. For example, wild mustard which may come

onto the farm with cereal seed, dangerous to have, especially if you grow cabbage, cauliflower, and lated vegetables. It is susceptible to the three most important dis eases of cabbage, and helps to keep them alive. And most importar' are the mosaic disease, especially sections where cucumbers are grown for pickles. The wild hosts of the bosaic disease are pokeweed, physa s or ground cherry, and mill

Watering Trough Leaks

may be necessary.

L. S. writes: "I have a four-by eight foot concrete watering trough ouilt in 1925. The last two years 16 seemed to leak thru the bottom ; he winter, causing ice to form! around the trough. Do you think! A heavy thickness of concrete o' top of the old, in the bottom, would fix the trouble?"
