Centralized School Plan: We, the undersigned, residents and voters of the territory to be included in the proposed Centralized School District at Andover, de-

cation to this proposed district. The statements set forth in that lieve them to be correct.

At the present time, the Government has offered to pay 45% of the cost of any necessary new construction. The State will pay 25% of the balance and the State aid available to the district will be increased annually from about \$40,000.00 to approximately

If these outside districts are lost to Andover, it is quite probable that we will lose our high school and be obliged to transport our high school students to some other high school. This conclusion is arrived at from the fact that it is quite certain that in the near future high schools which do not have a certain number of students , will be deprived of State aid and it would be impossible to continue 3 short time our high school without State aid. Without the students from the outside districts, there would not be a sufficient number to meet the necessary requirements for a high school.
