**SHIVERY DAYS!**

What are your heating plans for the winter? The times demand you should use a system that is low in price, economical in fuel consumption and comfortable in its delivery and distribution of heat.

Radiant Heaters send forth heat with the speed of light. They warm the floors and lower space; they are promptly effective at the level where people live.

If you have been away from home and come back to find the house cold, touch a match to a radiant heater and immediately you begin to feel the warmth.

Any heater will burn gas and give off some heat, but to get the best results the burner must be constructed along scientific lines. Great improvement has been made in the past few years along these lines.

We now have a complete line of Radiants, ranging in sizes from four double radiants to six double radiants, priced from \$7.50 to \$9.50.

We also have a good line of Circulating Heaters, constructed to burn coal, wood, gas or oil. Circulating Heaters in walnut finish are economical in fuel consumption and comfortable in their delivery and distribution of heat. They are not a heating plant for just a mere season, but for a life time. We offer them with confidence—for we have used them for both home and store heat.

We are able to make good prices to early purchasers. Come in and

Regular meeting of Edward Seaman W. R. C., Saturday night. John Zorn of Granger was elected master of the Allegany county Pomona Grange at its meeting in Cuba recently.

**PAINT WITH MOORE'S**

And this is about the last month that you will be able to paint outside this year. However, the next four weeks are ideal times to paint for the absence of moisture, bright sunny days, few flies and insects are all favorable to a good paint job.

If you are not prepared to do a complete job, you should at least put on a first coat, cover the surface with a preparation that will seal up all spots that have shown a tendency to chalk or blister.

For this purpose, Moore's Primer is the best product yet found. It took years to develop this formula and every painter that has used it marvels at the covering capacity and its ability to seal up all the rough and peeled spots.

A coat of this primer will put your building in condition so that the second coat will stay on in good shape and look good for a long time. You better start your job this coming week and get it finished before cold weather comes.

**LEAKY ROOFS**  
 A can of Roof Cement and a coat of Roof Paint will repair those places, if they are not too bad. If they are, a new roof is needed.

You will find us able to supply your needs in repair materials or new roofing.

**WASTINGS**  
 from  
**"Wandering Willie"**

WE ARE lying like blazes when we print the following that was handed us this week. But perhaps it will hit you like it didn't hit us:

Goodbye, Missie Summer wid de roses an' de sun; Glad to see de visitors dat greets us one by one. Howdy do Miss Autumn; Mighty glad you've come to town; Make yohse'f to home an' set yah mahket basket down. I hate dis tellin' tattles, but Miss Summer at de staht Wah so gentle an' so smilin' she won ev'ybody's haht. But she didn't wear. Her temper wah too dreful hot an' strong. Howdy do Miss Autumn! Mighty

glad you've come along. IT WASN'T hard to figure out what folks were talking about the first of the week. Any two or more people in conversation were talking centralization, some with wildly waving arms, others with gritting teeth and still others with glaring eyes, but now that it is all settled we can get back to earth and be the same small town folks we always have been, forgetting the animosities and bitterness that was creeping into the issue, and be just plain Andover folks again.

IT WAS rumored that the Andover firemen got first prize in the parade here last Friday night for coming the longest distance, although we haven't been able to find out yet just what it was.

BOY, oh boy, we never knew there were so many ways to get out of a sideshow before until the other night when a gang of local boys decided to vacate. We didn't notice

any of the fellows coming out the top, but they certainly did get out the back. It was very evident according to the mutterings going the rounds that "Somebody's a viper."

ANOTHER report going the rounds is that the cattle up at the grove are waxing fat on the pasture afforded them. We haven't heard anything about the kiddos, or the fence that has been raising so much rumpus up there, but the cows are contented.
