FRUIT, FLOWERS AND GARDEN

STORING POTATOS

F. V. Hardenburg

To store potatoes successfully requires first a crop of tubers of good storage quality. Only clean, sound, dry, well-matured potatoes store well. Dirty potatoes tend to hold moisture in the storage cellar, which promotes rot organisms. Dirt also tends to cause heating at the center of the pile, which increases respiration, shrinkage, and premature sprouting. If, because of bad weather, only muddy tubers can be dug, the crop should be held in crates in a well aerated place until the dirt dries and the skin sets. This is especially important in a bright year such as this. I caution those buying of he tubers will decrease the danger of spread of the blight poison in the storage cellar. If the crop has been damaged by field freezing, allow the tubers to thaw out and dry completely; then sort them thoroughly before they are put into the permanent storage. Otherwise, the slow thawing in storage will cause more damage among the sound tubers.

In digging the crop, studies have shown that machine diggers cause less bruising than hand diggers. Anyone who grows five acres or more of potatoes can probably afford to own and operate a machine digger. Between the hand-diggers, the hook and the fork, the fork seems to be the lesser of two evils.

DISH FOR THIS WEEK

A steaming bowl of fragrant cream of onion soup, sprinkled with grated cheese and topped by crisp, buttered croutons, is hard to beat on cool, windy fall days. This luncheon or supper dish is nourishing and cheap.

Cream of Onion Soup
2 cups of medium white sauce
1 cup of cooked onion pulp
1 teaspoon of salt
1 cup of milk, or water drained from the cooked onions.

To make the white sauce, melt 4 tablespoons of butter in a sauce pan and stir 4 tablespoons of flour and 1/2 teaspoon of salt into it. Cook this directly over the flame for several minutes, stirring it constantly and taking care not to brown the flour. Remove it from the heat, add 2 cups of milk, all at once, and stir until it is smooth. Return the mixture to the heat and bring it to an active boil, stirring constantly.

Put the white sauce in a double-boiler. Cook the onions in boiling water until they are tender, then rub them thru a sieve. To the white sauce add the onion, the salt, and the milk or onion water. If the mixture is too thick, add more milk. Cook it for about 10 minutes. If desired, sprinkle grated cheese over the top of each bowl of soup, and float a couple of buttered croutons, or toast squares over the top. (This is a good way to use up stale bread.) For lunch or supper on a crisp fall day, the New York State College of Home Economics suggests: Cream of onion soup, saltines, cabbage salad, warm baked apples with nutmeg cream and crisp cookies, milk for the children and milk or tea for the grownups.

WAKE UP YOUR LIVER BILE

Without Calomel—And You'll Jump Out of Bed in the Morning Rarin' to Go. The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Your whole system is poisoned and you feel groggy, weak and the world looks pink. A mere bowel movement doesn't get at the cause. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up." Harmless, gentle, yet amazing in making bile flow freely. Ask for Carter's Little Liver Pills by name. Don't stubbornly refuse anything else.
