**WASTED HEAT**  
 How often, when sitting in some room in the house you feel a cool draft. Often this is caused by a broken window.

Our stock of glass is complete and it is better to keep that heat in and save fuel by keeping all the windows filled with whole lights of glass rather than trying to heat with the windows full of broken lights.

Look your windows over and get them in good repair before the cold weather sets in.

**RATS AND MICE**  
 Do not neglect to start your trapping early in the season. Every one you kill now will mean many less next winter. If you have a few old traps, keep them set around in the places they frequent; look at them occasionally and see what luck you will have.

We have all kinds of traps to choose from at 2 for 5c for mice and 10c each for rats. If they are too clever to get caught, feed them Rat Rid or Rat Nipe—a poison that will clean them out.

**Combination Storm DOORS**  
 A real money saver in fuel and a great protection to your outside doors. The glass panel can be removed and the screen panel—put in for summer, thus saving the need of a regular screen door.

Some regular sizes in stock and other sizes supplied quickly on order.

 Mends all metals and is great for auto radiators. You apply it with your fingers and you have a sure repair job without heat. Price 10c and 35c.
