### Sharing

URING the past decade the welfare of our neighbors has had a direct imperative bearing on our come to say just one thing more: own welfare. None of us get along very well; these days if some of us get along badly. This not only applies to our town, our state, but to the whole country Home Sweet Home as a nation. Because of the growth of commerce and the sharing or trading in the various countries which! A OME wit has said that modern man has no need ing today to an extent that would have made our an-taker's parlors when he dies. cestors rub their eyes in astonishment. Sharing is an Beneath the exaggeration there is a truth which can share energy, enthusiasm, ideas, skill, knowledge, for him by social and economic pressures. tolerance, understanding, love and laughter, and when However, the backdrop of the ideal home still

And understanding of the cost of running an automobile. came to some of them because they were unwilling t It has been shown by numerous studies that it costs assume the personal responsibility which is the duty approximately \$30 a month to own and operate a car. every citizen of a democracy. This includes license, insurance, depreciation, as well i as gas, oil and upkeep. The important thing is to realize how much of the income is expended and whether or not it is worth it.

A child who has had to earn all or part of his allowance by contributing something to the home develops in a way impossible for a child who receives everything and gives nothing.

Parents may discover that they have given their children something infinitely more important where all have worked together toward planning the income t the best advantage of all. By learning to manage their income happily they have improved the management of living.

OPPOSE the mythical man from Mars came up to you some day and asked you if you were an American. You'd say, "Yes," of course. Then supinose he asked you another question: "What is an American?"
