the differentiating line which is crossed and recrossed Their succulence and shape. They differ from by the honost and the discerning. We cannot safely The wild unwatched variety. The man make a convenience of our conscience, or shackles of Who gave them so much care remains unknown an arbitrarily imposed confession of faith. The determining and deciding test can be made only by ourselves . as conditions, circumstances, and emergencies combine to make a decision necessary.

The modern arts of war, it should be remembered are designed as much to discourage and repel aggression as to cause human suffering or loss. There is an ; unascertained power in wise preparedness. No lesson; of the present conflict overseas has been more convincingly taught than this. Remaining to be convinced of the sincerity of the evasive plea of the conscientious) objector are those of the great and overwhelming majority of Americans who appreciate both the wisdom destiny. and necessity of at least posting a strong, equipped and

determined guard at our doorways. Even those who apparently justify in their own osophy and alien aggression that they also are not in be wrong. sympathetic alliance with civilization's arch foe. Long ago it was said: "He that is not with me is against me." Righteousness, in its hour of trial at the hands of them is unnecessary. its betrayers, stands personified.

The greatest liar is he who talks most of himself

Better Food Is U. S. Defense Factor

IN THE weeks to come we are going to become aware, of the necessity of better household food. This has been done with milk and its attributes. Citrus fruits to control colds, spinach and Popeye to create muscle, and hosts of other illustrations. Up to date there is a vast supply of food commodities and many sources or import and exchange under blockade, so it is up to t.

standard and well it should. It was during the first World War that we become onscious of vitamins and the nutritive values of loods. We knew certain foods were necessary but not | so much about the reason why. We have discovered some wonderful information in this research of essen-Hamel's farm house. tial foods, and there is a program to strengthen the Nation's human defenses thru better household purbuilt on the pond.

Publicity, as is the American way, will play a big

in this program. Housewives will be given sugsist the buyer and family to raise the nutritional levels bridge to be built over Dyke Creek E. A. Blair, after one year's strug- ius Delaney of Alton, Pa., and a six of the country. Foods which protect health, food prep-INCE the American manufacturers have become aration methods and information on the availability of self-reliant in the making of toys, the intelligent essential foods will be included in these plans.
