An Important Request GAS CONSUMERS

Conserve All the Natural Gas You Can for the Rest of the Winter Season

WHY?

Because there is a serious shortage of natural gas in many parts of Western New York—a shortage that threatens to interfere with the production of vital war materials—a shortage that can be avoided only with the help of ALL natural gas consumers in the whole area. Reserves must be conserved to meet the demands that always come in February and March.

HOW YOU CAN HELP

Any gas conserved by our customers can be made available through existing connections to relieve shortages in other parts of Western New York. We pledge our best efforts to see that the savings YOU make will be used where they will help the war effort the most.

METHODS

You know best how you can save natural gas. We can only suggest some possible ways:

Heat only those parts of your home you use regularly.

Reduce temperature when you are not at home, and at night.

Keep shades drawn, particularly at night.

Keep use of hot water to minimum.

5. Close fireplace flues when not in use.

6. Shut off heat in garage.

Several other suggestions for those few extremely cold days:

Delay home laundering.

2. Economize on gas for cooking by your choice of foods. Avoid use of oven.

A SMALL SACRIFICE ON YOUR PART—AND—A CHANCE TO REALLY HELP WIN THE WAR!
