# Victory Ships First Learn to Travel

You may not recognize them even when you see them, but those Victory ships, launched with such amazing speed, actually travel first on land.

American railroads are carrying these ships in prefabricated sections across -cornfields, over mountains, and through valleys to shipyards for quick assembly.

The high, wide clearances of railroads such as the Erie make practical the assembly of these huge ship sections far inland. And this prefabrication is speeding the construction of Victory ships at a record-breaking pace.

America is now producing more ships than all the rest of the world combined! And America's railroads are helping in every way they can to work this production miracle.

NONE OF AMERICA'S RAILROADS-ALL UNITED FOR VICTORY

Arling R. Baker, Andover, N. Y.
