TEEPING the roadbed, equipment, and facilities in fit condition to meet the demands of wartimes is a twenty-four-hour job with us.

Day and night, the task of inspecting, checking, repairing, and replacing goes on.

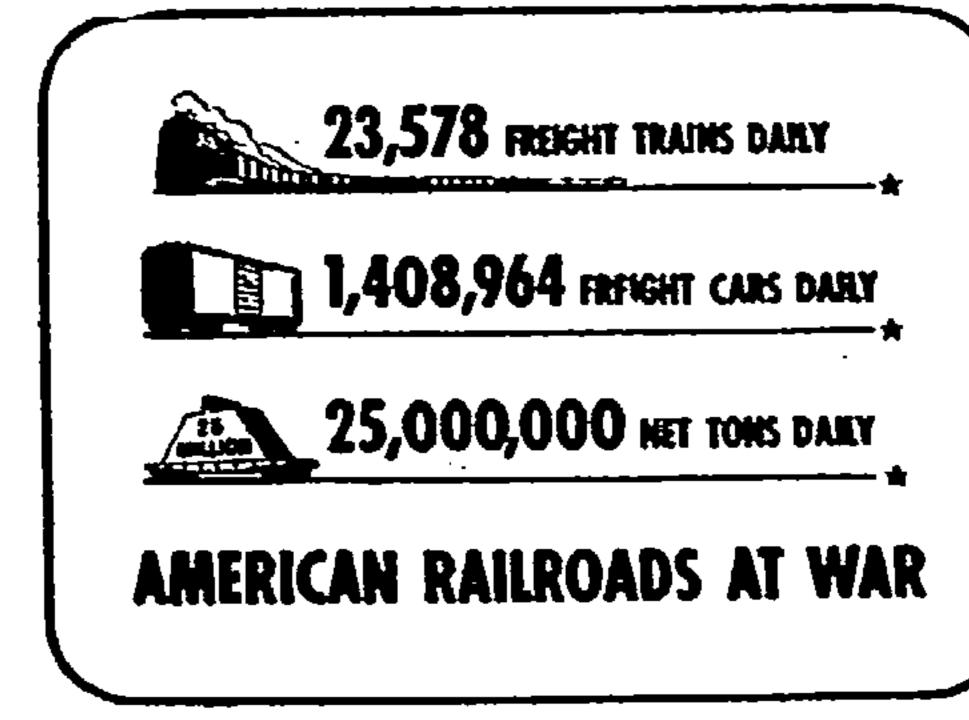

Along the right of way, in the shops, in the yards, and at the terminals, Eric men are on the job seeing that locomotives and cars are kept rolling.

Operating behind the scenes, the work of these men is vitally important in maintaining an endless stream of supplies to both the war front and the home front.

Their work gives us further assurance that in war, as in peace, American railroads can continue to give the best and most economical transportation in the world.

regularly makes a etronger, better roadbed for fast, dependable
