## HAS 50,000 "SHIPS" ON LAND

DELIEVE it or not, the second largest D user of America's great railroad system is the United States Navy—now the greatest sea power on earth.

More than 50,000 freight cars are used every month to keep men, materials, and supplies flowing for this great Navy. Since Pearl Harbor more than 40 aircraft

carriers and more than 400 fighting ships have been added to the Navy. Building these ships required the delivery of tons and tons of materials and armament by Erie and other American railroads on an exact schedule.

Then, too, men trained far inland for duty on these ships-food-fuel-and equipment must be transported in huge quantities every day to keep this Navy going. Navy Chiefs say that without the rail-

modern Navy. Keeping America ahead in war, as in peace, is the most important job of tile Erie and other American railroads.
