H. H. GOODRIDGE Phone 758

When you go to buy things today you know what's happened to prices. Well, the railroads are up against the same problem. Everything the railroads buy, from steel rails to box cars, has jumped nearly double in price since 19391

Since that time freight rates have increased only 52% and passenger fares a scant 25%. Now that doesn't add up!

You begin to wonder how the railroads do it—continue to do the great job of

greater efficiency through their huge investments in better tools and equipment. The men who run the railroads know it takes constant building and improv-

ing to keep giving the finest transportation at the lowest cost. That's why for the past 25 years they have wisely plowed back an average of \$2.00 for new equipment for every \$1.00 paid out in dividends. In the last few years

for the nation. The sesswer, of course, is

this ratio has been even higher-about providing dependable transportation \$4.00 for every dividend dollar! To keep on doing this fine job, the rail-

roads must be allowed a fair profit for the services they perform. For that is the only way they can further increase their efficiency and keep costs down for their customers in the future. To put the whole story in a few words—

GOOD EARNINGS TODAY MEAN BETTER SERVICE TOMORROW!

SERVING THE HEART OF INDUSTRIAL AMERICA We havite you to listen to "The Railroad Hour" Monday nights over A.B.C. 1 to 2:43 P.M. E.S.T.
