JERRY PRIOR, Prop.

ARE YOU ANY GOOD

HE large part of the jigsaw puzzle marked "Costs" represents what the railroads spend to keep them running efficiently. Everything the railroads buy has doubled in price since 1939.

The small part of the puzzle marked "Rates" represents money the railroads get for their services. The reason it is so much smaller is very simple. Railroad charges have not kept pace with costs! Since 1939, freight rates have increased only 52%; passenger fares a mere 25%.

railroads able to operate efficiently on these low rates while costs are twice as high? Well, here's the answer in one word-Investment! For the past 25 years, the railroads have been plowing back their earnings-2 dollars for new equipment for every dollar paid out in dividends. As a result, the railroads are able to do a better job at great savings for

Now the puzzle is this: How are the the manufacturer, the supplier and of course, you, the public.

But that kind of progress can't go on if earnings are kept too low. Like other companies, the railroads need a fair profit for their services. That's the only way they can keep on doing the fine job that has made the American railroads the standard of the world in dependable, economical transportation!

Good earnings TODAY mean better service TOMORROW!
