Within An Hour. Will Be Burned To Death

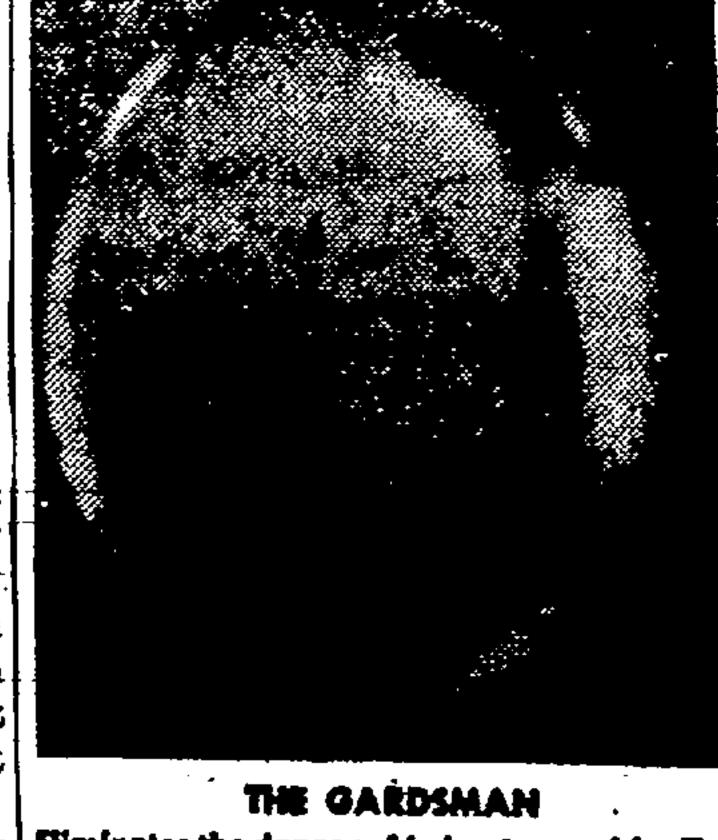

10.000 human beings and three hundred million dollars worth of propabout 30 people per day—more than

We all fear fire and particularly dread the idea that a fire may break out while we are sound asleep and that we may be overcome by smoke and burned to death.

Sleeping families — women and children—helplessly trapped in their homes -- perish in the night. They didn't expect the fire any more than you expect one. Had these fires been discovered when they started, i would perhaps have been a different story — probably no story at all.

be extinguished if discovered in time. If you have never experienced the it, nor does it depend on electrical shock of standing helpless while a fire power—batteries—fuses, or the like. consumes your home and possessions. It is a strongly built mechanical deyou cannot realize what a feeling of Vice, controlled by a sensitive metal security one has when a proper equip- thermostat which starts the alarm ment is installed to immediately give when the temperature indicates' you warning that fire has started.

"The GARDSMAN" Fire Detector complete in itself that does not de- or ask us to send a representative to pend on the human element to start your home, without cost or obligation.

Most fires could easily and quickly | Eliminates the danger of being trapped by Fire

An overheated furnace is detected and Alarm doesn't give a fire a chance by this delicate instrument, which to gain control—it sounds a loud sends out warning of possible danger. alarm almost as soon as a predeter- Simple to install, no maintenance mined heat is reached. "The GARDS- expense and the cost very low. Come MAN" is a Fire Detector and Alarm in right now and see a demonstration
