Wellsville, N. Y.

Dear Parent:

Foot troubles which become painful deformities during adult years often result from minor defects in childhood, possibly they have been overlooked.

It takes 20 years to develop a child's foot. They should be watched carefully from childhood.

It may pay you, if you are not doing so, to be more particular about your children's footwear. We carry many shapes, sizes and widths. We would like to help you select the proper fit for your child and check it by X-ray.
