#### Better Health For Children

\ Community Service Issued by Children's Hospital of Buffalo, N. Y.

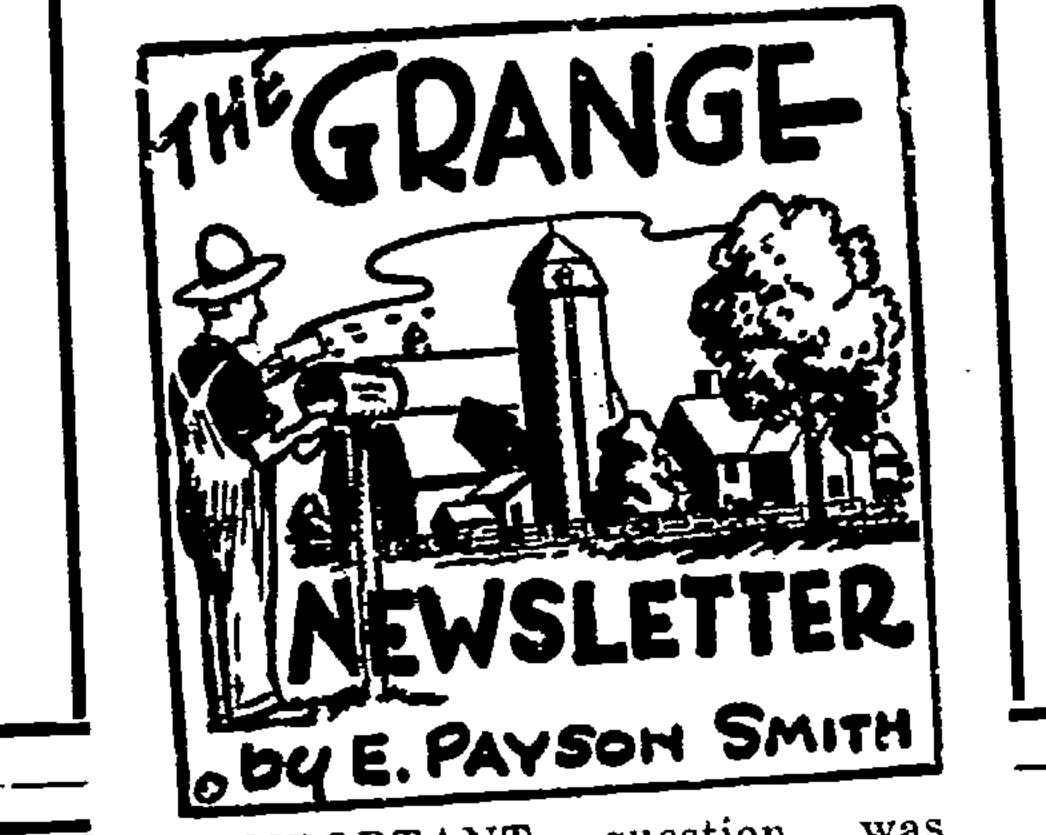

fresh pasteurized milk every day, be safe and boil it. When it has cooled, store it in sterilized bottles in the refrigerator until it i.

In addition to thoroughly washing, bottles, cups and nipples require boiling particularly during summer months to reduce possibility of bacteria formation. Milk which may cause diarrhea. After bottles and milk cups, place it on the stove and allow it to boil at least five minutes. If you add a small amount of vinegar to the water, your bot-

tles will not be cloudy. Nipples should be boiled only once or twice a week. After washing them inside and out with soap and water, rinse and dip them in boiling water for a minute or two. When you do boil them, add a teaspoon of salt

to the water to prevent from becoming too soft for use. Because parents are apt to get careless in observing these simple precautoins, doctors advocate reminding them of their importance. Too often who have fresh, pasteurized milk delivered every day and whose homes are spotless are inclined assume the "it can't happen " attitude toward milk pol-

Yet it is only by routinely practicing these precau-tions that the incidence of infant diarrhea, or "summer complaint" has been reduced.
