"Look To The Future" By Charity Howland

As we begin this year of so much happiness and cooperation, we look back and wonder how was it that we were so luckly to have a country like America and town like Andover in which to study. Just across an ocean we see others are not so lucky: no Bill of Rights, spacious schools, democratic government or protected home life.

Shouldn't all these factors be considered before we open that door? We can preserve these ideals only by hard work, faith, determination and cooperation. Perhaps the most successful career can be found by the lad who remembers the other fellow and can get along with him. Oh. of course, we'll have other careers just as successful as that one, but we can continue to have our cherished home life, free education, Bill of Rights and democracy i we think a little about him now. Let's Watch Our Riding By "Tod" Harris

There have been a few boys and girls in our school who have been turning left into traffic without signaling while riding their bicycles. Still others have been zig zagging back andforth across the road not paying any attention to whether cars were coming or not.

The drivers don't want to hit you if they can prevent it. But they can't help but hit you when you deliberately cut your bicycle in front of them without signaling before turning.

We have already had one bicycle accident to an Andover school pupil, so let's watch our riding and give signals if you want to turn and don't try to do stunts or put on an act for any one while in the middle of the road.

In the fourth quarter both teams played excellent ball and neither team
