#### Take Care of Your Dog

Police Albert Rogers makes the following statement Mar. 17—"Enemy regard to dogs running alone There comes a time when pets

such as dogs become a nuisance respect for convoy escorts dur- and that time is when we neglect looking after them properly, especially during this season of the year. Owners of females kick them out of the house into a garage or other building near the ground, every male catches the scent and goes calling. Barking, growling and fighting result. That's when the complaints start. The little dogs come home all chewed up, the owners want the big dog punished, the neighbors don't like the noise so they complain. Small children have been bitten by these dogs and parents

want the dogs disposed of. l have been harassed for the past week with telephone calls and complaints made in person from a certain section of town because a female dog owner had not properly taken care of his dog. Under the night quarantine that I can't catch out nights, so after don't complain if he comes home with a leg half shot off as it is hard to shoot a dog in a vital spot after dark.

Arthur Genung is willing to start a kennel to keep female dogs in during this season if the owners are willing to pay a small fee for board. If you are interested contact him.

Every dog I kill the owner will be charged with violation of the night quarantine and owners of female dogs will be charged with harboring a nuisance. Lets take care of our dogs or dispose of them in a more humane way.

ALBERT L. ROGERS Chief of Police
