## Better Health For Children

A Community Service Issued by Children's Hospital of Buffalo, N. Y.

The current poliomeyelitis epi- and diffic demic in Texas has aroused un- lowing. usual concern but doctors of the Children's Hospital remind par- fantile paralysis, do not become ents that according to Health De-hysterical. Maintain your normal partment reports, there were only way of life with the following ex-119 cases in this area last year. ception: avoid travel through Thus far this year there have not epidemic areas, avoid crowded been an unusal number of cases places, don't use eating usensils reported to the department.

Because the method of spread been determined, pediatricians advocate certain precautions. Special care should be taken to have hands washed before preparing ing an epidemic. and eating foods and after using

swimming so long that a chill follows. Do not allow children to sit around in wet bathing suits because this increases the risk of

The following the signs of illness which should be reported to your doctor immediately: headache, fever, sore throat, stomach upset, sore muscles, stiffness the back or neck, unusual fatigue and difficulty in breathing or swal-

In case of an outbreak of inor towels which have been used by anyone else, postpone nose and of infantile paralysis has not yet throat surgery if possible. Health authorities generally agree that i' is safer to leave a child at a camp than to have him travel home dur-

Parents and doctors alike are the toilet. It is unwise to get watching with interest the experiovertired by play, travel or work mental use of gamma gobulin in during the polio season. (Visits Texas. This serum was discoverfrom friends who come from polio ed and developed by Dr. William infected locations should not be Hammond, professor of epidemiencouraged because it is possible ology at the University of Pittsto carry the infection to others burg. It was given its first trial without being actively sick. The as an immunization agent last polio virus has never been known year in Utah, much more will, it is to be transmitted by swimming hoped be known next year about water but it is not wise to stay in its effectiveness.
