unanimously adopted by the Trust-	a surprise,
ees. Two of the recommendations were the questions of parking and traffic which led to the abolishing diagonal parking and setting up parallel parking throughout the length of Main St. Since this limits the parking spaces, suitable parking area must be found. Purchasing such an area rises the question of costs to the Village, the degree of improvement needed whether or not parking should be free or on a metered basis. Indications are that Wellsville's traffic problem will grow more serious with the uptrend in motor vehicles and what are her problems now may visit to neighboring comcunities as the problem is universal.
