A helping hand for the world's best education

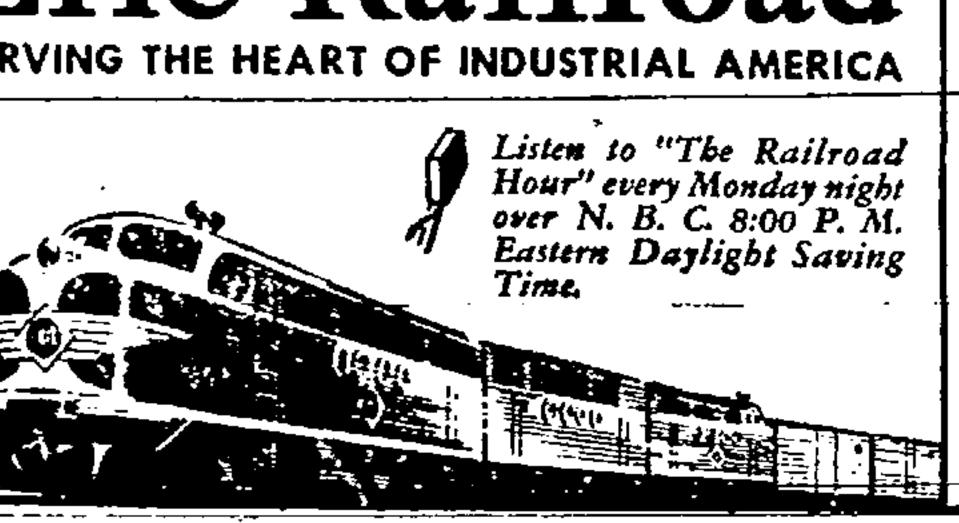

• Your children benefit from the great privilege of the American school . . . with its promise of a brighter future for all through a good education. The money to provide the world's best education comes from

various sources . . . much of it from real estate and other taxes. As a home town partner, the Erie Railroad pays direct school taxes along with other industries in your community. As a self-supporting industry the railroads buy and maintain their own "steel highways," stations, and other property on which they

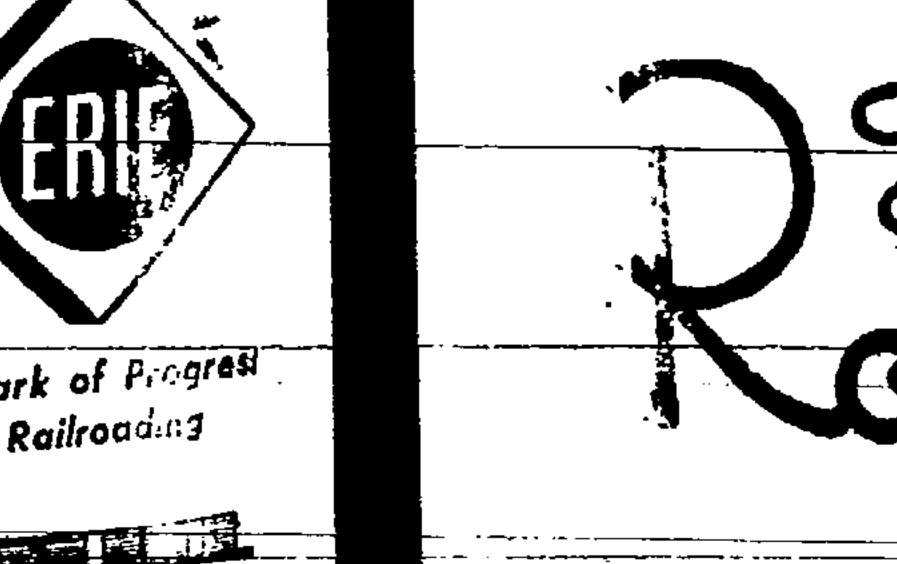

pay their share of taxes in the communities they serve without depending on facilities provided with "taxpayers' dollars" to carry

on their business. Last year the total tax bill for the Erie was over about \$50,000 every day of the year! And a good to support local schools in your community. Here is another example of how the Erie fills the neighbor. For this is in addition to its primary job or providing safe, dependable transportation 24 hours a day.
