American Education Week

This week, November 9-15, is being dedicated to American Education. The purpose is to familiarize the public with the work of education and the problems of training children for effective citizenship.

Education Week came into being in 1921 from a meeting of representatives of education and the American Legion. It has been developed greatly through promotion by the NEA (National Education Association) and the United States Office of Education. Through the World Federation of Education Association, other countries have also adopted the tradition.

Education is a continuous process and through its formal, some informal. Our formal education teaches us facts, theories, and skills such as reading and writing. Our informal education consists of our attitudes, preferences, and our relationships with other people.

Education is essential to the future of our nation. We, the American people, must be a part of this, not only during this special week, but all year long.

Veteran's Day - November 11
by Mary Howland

Veteran's Day in the United States commemorates the great courage and patriotism displayed by all of the men and women who have served in our Armed Services. In 1919, President Woodrow Wilson proclaimed November 11 as Armistice Day to help remind Americans of the recent tragedies of war.

In 1938 the Congress passed a law making the day a Federal Holiday. Sixteen years later its name was changed to Veterans' Day.

In the present day and in future conflicts many Americans will lose their lives, be wounded, and some will return home with unforgettable memories. They do this willingly so that the future generations might live in a "free from war world". So, it is our duty and privilege to thank these courageous Americans this Saturday, and everyday to come.

Student Opinion

There is great excitement about this time of year and a great rush on the part of the students to maintain marks that will meet the standards so they can swim or play basketball. By the end of January where has all this push and excitement gone to. Especially from the spectators.

Every night after school, sometimes on Saturdays and during our vacations our swimmers and basketball players practice until their coach feels they have met the requirements for that day. But, yet when the time comes at meets and games for these boys to show what practice has done for them, how many of us are there to cheer and back up these fellows, that is besides their faithful parents?

Granted, there has been nothing in town for us to do on Friday and Saturday nights lately, but now we've got basketball games and swim meets to keep us occupied for a length of time.

So, come on fellow students, let's really show swimmers and basketball players how proud we are of them. Let's give the coaches and these boys wholehearted support!
