**The Bombing Halt**

Since President Johnson's orders of last week to stop the bombing of North Vietnam, there have been many speculations on the reasons behind his decision. The first reaction of many was that this abrupt change in policy was for the sole benefit of Vice-President Humphrey and his bid for the Presidency. "If the bombing can be stopped now, why couldn't the same thing be done long ago?" is the argument of many.

But again, things look bright at the moment as far as negotiations are concerned. Hanoi considers the bombing halt to be a great step towards peace. There's still another problem, though — South Vietnam. The refusal of their government to take part in negotiations is a major concern right now to the United States. We've been fighting there for so many years and now the leaders of that war-torn country won't even talk peace! Why? It could be that the South Vietnamese are afraid of United States withdrawal and what could happen as a result. On the other hand, maybe they just want us out of there and by not cooperating, their goal could be attained.

Millions of Americans want to withdraw from Vietnam. Could this be why President Johnson has called a halt to the bombing? Only time will tell.

By the time you read this, a new President will have been chosen. Perhaps his views will differ from those of the present administration concerning the war. Hopefully, by the time he takes office, some kind of settlement will have been reached.
