Winter Carnival At Honeoye Lake To Be Held Jan. 25 - 26

The eighth annual Winter Carnival will be held on the frozen surface of Honeoye Lake during the week-end of January 25 and 26, 1969. This top outdoors event of the Finger Lakes region will feature sled dogs, snowmobiles, motor cycles, sport cars, go-karts and many other races and rides over ice and snow.

On Saturday night the Queen of the Carnival will be chosen from over 20 candidates, each representing a county in western New York State. There will be a fur auction sponsored by the Genesee Valley Trappers Association, as well as style shows, art shows and a series of exhibits.

The Carnival is run by the people of Honeoye, working thru various civic organizations, such as the American Legion and Auxiliary, the Art Club, the Chamber of Commerce, Boy and Girl Scouts, Churches, Firemen and Auxiliary, Fish and Gun Club, the Nursery School, Masons, Rotary, Parent-Teacher Assoc., the School Faculty, the Red Cross and the Trappers.

There are rides and spectacles for children and adults — admission is free — there's plenty to do and see! We hope you and your readers will plan to visit Honeoye on the 25th and 26th of January, to enjoy a winter wonderland.

Scout Plans For "Boypower '76"

At this time of the year we seem to get many year-end reports, and it also seems that a great number of them are on the negative side — increases in crime, young people getting into trouble, disturbances, joblessness, and so forth. It is always refreshing to receive a year-end report that shows progress. We are referring to the report we have just received from our local Scout council.

The Central District of the Seneca Council Boy Scouts of America reports that 1000 of our community's boys, aged 8 through 17, are now active in the Scout program. The Central District covers the entire greater Olean area. This is a large number of kids. But unfortunately it's kids we seldom hear about. Kids who are active in programs that are beneficial, who are learning to take care of themselves and are developing a sense of community responsibility.

Another thing common to most year-end reports is a look ahead. Our Scouts are no exception to this. Only this time they are taking a long look ahead. Eight years to be exact. This is the time span to be covered by Scouting's new long-range plan called "Boypower '76". It promises to increase Scouting's penetration into every strata of American society; to bring Scouting to boys wherever they may be found; and to increase program quality for boys in Scout units.

We think this is great, and will be looking forward to seeing more of the Scout plan for "Boypower '76". If there ever was a time that our community and our nation needed good men, it will be in the years and months ahead. It looks like this long-range plan that the Boy Scouts of America has launched will help meet that need.

Chinook Salmon To Be Added To New York Waters

The coho salmon, which has fired the imagination of New York fishermen, will soon be joined by its larger brother, the chinook salmon, in the New York Waters of the Great Lakes.

Conservation Commissioner E. Stewart Kilborne has announced that the Department has received 74,000 chinook salmon eggs from the University of Washington College of Fisheries in Seattle. These eggs are being hatched at the Warrensburg Fish Hatchery and are the largest eggs ever hatched at a New York State hatchery. Brook trout eggs average 300 to 400 per ounce compared with approximately 56 chinook eggs per ounce.

The chinooks will be experimentally stocked this spring as 2 1/2 inch fingerlings. Chinook salmon migrate from their nursery streams as spring fingerlings while coho salmon remain in the stream another year and migrate as 5 to 6 inch yearlings.

Commissioner Kilborne said the stocking of chinook salmon is part of the Department's overall program to establish fishing for species of Pacific Salmon in the Great Lakes.

The chinook or king salmon is the largest of the Pacific salmon with mature 4 year old fish averaging about 20 pounds but 40 pounders are not uncommon and fish in excess of 100 pounds have been recorded. In addition to its much larger size the chinook has a life cycle of 5 or 6 years compared with three years for the coho.

Chinook salmon are considered to be second only to the sockeye as a food fish and because of their size and strength many fishermen rate it as the king of the Pacific salmon.

Stacking sites for the chinook have not yet been determined but the Department said only Great Lakes tributaries are being considered.

Coho salmon were stocked by the Conservation Department this past spring in tributaries of Lake Erie and Ontario. While some cohos were caught during the summer the main run is expected next fall.

Aliens Must Register

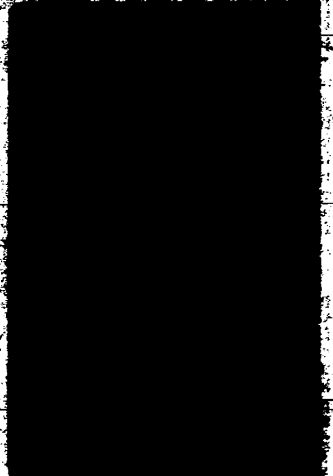

Information furnished by an Alien in making his annual address report to the Government is confidential.

According to Mr. William J. King, District Director of the Buffalo Immigration and Naturalization Service Office, the information furnished by aliens in reporting their addresses has been declared confidential by statute.

These reports must be submitted during January each year by all aliens in the United States, with few exceptions. Forms on which to submit the reports are available at any Post Office or office of the Immigration and Naturalization Service. Persons who are unable to pick up a form because of illness, or other reasons, may have a relative or friend obtain a card for them.

The card should be returned to one of these offices. Parents or guardians of aliens under fourteen years of age submit reports for such children.

Deborah Ann Fox

Announce Engagement

Mr. and Mrs. Merle Fox of Andover, New York, announce the engagement of their daughter, Deborah Ann Fox to Richard G. Barry of Westfield, son of Mr. and Mrs. Garth Barry of Westfield, New York.

The bride elect, is a 1968 graduate of Andover Central School and a freshman at Arnot-Ogden School of Nursing.

Her fiance is a senior at Alfred Ag Tech.

No date has been set for the wedding.

Salt Glaze Show To Be Featured At Genesee

An Invitational Salt Glaze show, featuring the works of six ceramists from throughout America, will be held in the Gallery of the Fine Arts Building, State University College of Arts and Science at Genesee from January 20 - February 14.

The public is invited to attend opening - night festivities beginning at 7:30 p.m.

Alan Peterson, gallery curator, and assistant professor of art, Carl Shanahan arranged the exhibition which will show ten pieces by each exhibiting artist. Emphasis will be on salt glaze application to sculpture.

Salt glaze requires special kilns and for that reason potters working in that field are limited. During firing common salt is thrown into the kiln, the salt vaporizes and coats the pots with a glaze of sodium silicate. Color is achieved by the reaction of the salt to elements in the composition in the clay, slips, and engobes. This practice has been in use since the 12th Century, Mr. Peterson stated.

Appreciation

I wish to express my appreciation to the friends and neighbors for the visitations, cards, gifts, flowers and other remembrances sent to me while I was in the hospital. Also special thanks to the Andover Volunteer Ambulance Squad for their prompt assistance.

Richard Appier

Appreciation

I wish to thank my relatives, neighbors and friends for the lovely cards, flowers and other remembrances that I received while I was in the hospital. They were all greatly appreciated.
