On February 14, millions of people throughout the world will celebrate the festival of Valentine's Day. Cards of love and friendship will be sent out and countless boxes of candy given.

Valentine's Day didn't gain popularity in the United States until the Civil War period. Since then, it has become an annual day of celebration to all in our country.

Senior Interview

One of the most active members of this year's Senior Class is Richard William Joyce, born on December 21, 1951 to Mr. and Mrs. Charles Joyce. "Dickie" has one brother and two sisters.

Dickie's major business. He has been very active in sports, having been in soccer and basketball for four years; track and baseball for three years, and Varsity Club for four years. He has also been a member of Library Council for two years; Red Cross for one year and Choir for one year. He was elected President of the Student Council in his Junior Year.

Dickie's plans for the future are indefinite, but we know that he will succeed in whatever he chooses to do. We at Andover Central School wish you the best of luck in the future, Dickie.

LIVING UNDER LAW

SNOW SUITS

Over the past few months, winter sports have yielded their usual crop of collisions. The medical consequences, as a rule, are painfully plain to see. But what of the legal consequences? Who is liable for the damage done? There are several basic principles of negligence law that are likely to provide the answers. One is that the management of a recreation area must set rules that will keep danger within reasonable bounds. For example:

At one winter playground, sledders and novice skiers were allowed to mix freely on the same slope. A girl skier, felled by a careening sled, sued the management and collected. "It is common knowledge," said the court, "that careening sleds are not easily controlled, while novice skiers are notoriously unable to direct their own movements. The likelihood of these runs made serious accidents not only possible but probable."

A second principle is that the management of a recreation area should be in good working order. Thus, a court held that a skier could collect damages for injuries caused by a hole in the snow.

for injuries traceable to a faulty switch on a ski tow.

On the other hand, the sportsman too must show a sensible concern for his own safety. Take this case: A determined young couple kept right on taking rides on their toboggan, even though the path ran dangerously close to a tree. Sure enough, they finally hit the tree. The girl was injured, and in due course filed suit for damages. But the court ruled that she herself was guilty of negligence, for continuing to toboggan in defiance of the obvious danger.

Furthermore, the very fact that you ski, skate, or toboggan means that you voluntarily accept those risks that are inherent in the sport.

Court emphasized that point in turning down the claim of a skier who was thrown off balance by a minor irregularity on the slope. Like any skier, said the judge, "the plaintiff was not seeking a retreat for meditation. He took the chance of such a fall". And the judge added:

"To hold that a ski trail down a mighty mountain, with snow conditions that kept level and smooth, free from holes, would be to demand the impossible."
