You get a little over \$4.00 for every \$3.00 you invest.

And that's nothing to sneeze at.

Some people have misconceptions about Savings Bonds. They think they're a safe investment but they don't really give much in the way of returns. Look at it this way. U.S. Savings Bonds now pay a guaranteed rate of 6% a year over \$100 for every \$100 you invest, in just seven years. On top of that, the interest is exempt from state or local income tax, and Federal tax may be deferred until you cash the Bonds. That can make a real difference in what you actually get back on your investment. Also, buying Series E Bonds lets you purchase higher interest Freedom Shares in combination — and they pay a full 6% when held to maturity of four and one-half years. Any way you look at it, Savings Bonds are a good investment. And you know something? They always will be.
