## Hastings Reports Cont.

would be on the \$42,500 a year he earns as a Congressman.

"In disclosing my assets I want to include the most important of all and that's my lovely wife and five wonderful children who have put up with my frequent absences in Albany and now here in Washington," Rep. Hastings said. "Without their understanding and encouragement, I would be poor indeed. As an asset to me in everything I do, their worth is incalculable."

## BANK NOTES ..... by Malcolm

**DID YOU KNOW...**

DURING THE CIVIL WAR, A PHILADELPHIA ENGRAVER TURNED DOWN AN ORDER TO MAKE COIN-STAMPING DIES FOR THE CONFEDERACY. HE FEARED ARREST BY THE UNION FOR AIDING THE ENEMY.

TO CELEBRATE ITS GRAND OPENING, ONE BANK IN ARKANSAS PURCHASED AN EXTENSIVE COLLECTION OF ART BY ARKANSAS PAINTERS. LATER, THE BANK LOANED THE COLLECTION TO CIVIC GROUPS AS A CULTURAL PRESENTATION.

GOLD HAS NOT CIRCULATED IN THE U.S. AS MONEY SINCE 1933 AND THE GOVERNMENT SUPPLY IS HELD IN THE FORM OF GOLD BARS TO SAVE THE EXPENSE OF COINAGE. SINCE A STANDARD OF VALUE, GOLD'S WORTH IS THE SAME WHATEVER THE FORM.

## BUTTER AND FRESH CORN

Is there anything sweeter than fresh corn on the cob — with butter?

If there is, it's news to me. Corn is one of the traditional American delights. And butter — well, butter traces back to the earliest days of man.

Butter probably was first made by prehistoric herdsmen. When they poured milk or cream into animal skin bags and hung them over horses, or camels, or other domestic animals, the animal's stride shook the bag agitating the milk or cream until butter was formed.

**An Accident?**  
This may first have happened by accident. You can be sure, thereafter, it was done on purpose.

**Many Biblical References**  
There are many references in the Bible to butter. Hindus recorded their fondness for butter more than 3,500 years ago.

Butter is a rich source of vitamin A. It also contains vitamin D, vitamin E, calcium, phosphorus, sodium and potassium. The energy value of butter is 33 calories per teaspoon, the same as margarine, but less than that of cooking and salad oils.

Butter consist chiefly of milk fat, milk curd, and water. On the average, the fat content of both salted and sweet butter ranges around 80 percent. The moisture content is as high as 18 percent. The curd content, containing protein, mineral matter, and lactose (milk sugar), averages as high as 15 percent.

**From Pasteurized Cream**  
In the U.S., virtually all commercially prepared butter is made from pasteurized sweet cream. The cream from more than 10 quarts of milk is needed to make 1 pound of butter. Modern cylindrical or barrel churns are capable of producing as many as 5,000 pounds of butter per churn per hour.

**Federal Standards**  
Federal standards employ a numerical score that is based on butter's texture, flavor, and other characteristics. U.S. Grade AA, the grade generally available in most stores, has a score of 83. Grade A butter has a score of 82, indicating a slightly lower quality. Grade B scores 80. Grade C is 80 and is used for commercial purposes only.

Now where is that slice of bread I was about to spread with some tasty butter?
